WHY THIS SERIES?

The purpose of this series is to **teach Apologetics** to our people. It is very important that we equip our self by the right information about the **existence of God & the authenticity and infallibility of His book all with evidence from science**. This kind of education has never been **so badly needed** as it is now **for our kids and youth survive the vicious attacks on the Bible and God** in all walks of life, be it school system, media, press, books, museums, colleges, social, entertainment, ...etc. This vicious attack, although as old as creation itself, it increased during the enlightenment age but **it sky-rocketed since the 1970's**. The root cause of all this attacks **unquestionably is the evolution theory** which replaced the godly creation by godless one and therefor there is no need for a God with all the moral and legal responsibility to submit to His authority and commands and not living sinful life.

This series will have sections **refuting evolution** be it cosmic, chemical, astronomical, organic, and biological. Other sections **discussing all-or-nothing complex systems that are impossible to explain through bit-by-bit random evolutionary processes as incredible examples of God's handiwork in His creation**.

This presentation discusses the Big Bang and the solar system. The Big Bang is the universal evolution philosophy which tries to explain the origin of the universe as natural process and therefor there is no need for God. This presentation will show that all the solar planets and their moons defy the Big Bang and thus glorify God who created the whole universe and fine-tuned it so precisely to not only enable but also flourish life on the earth.

God's account in Genesis 1 of Creation in 6 days

"IN THE BEGINNING GOD CREATED THE HEAVENS AND THE EARTH." GENESIS 1:1. HOWEVER SCIENCE BENDS BACKWARDS TO DEFY THIS AFTER ALMOST SIX MILLENNIALS OF COMPLETE COMPLIANCE. THIS COMPLIANCE WAS THE DRIVE BEHIND THE SCIENCE FLOURISHING DURING THE LAST THREE CENTURIES. IRONICALLY, THIS SAME FLOURISHING IS HIJACKED BY THE EVIL POWERS TO UPROOT THE MILLENNIALS LONG BELIEF IN GOD AND HIS REPORTED RECORD OF CREATION DESPITE THE GLARING SCIENTIFIC EVIDENCE OF THE OPPOSITE. THIS PRESENTATION SHEDS SOME LIGHT ON THE FAILURE OF THE BIG BANG; THE ACCLAIMED SCIENCE GODLESS CREATION OF THE COSMOS, AS APPLIED IN OUR SOLAR SYSTEM. **DEBUNKING THE GODLESS CREATION LEAVES US WITH THE OBVIOUS: GODLY CREATION IS THE REASONABLE CONCLUSION.**

NOTE SOME OF THE INFORMATION MAY TOUCH UPON COSMOLOGY AND ASTRONOMY TO STRESS SOME POINT HOWEVER THIS IS NOT NECESSARY FOR UNDERSTANDING OF THE OVERALL THEME.

DESPITE THE UNGODLY CLAIMS THAT CAME THROUGH THE BIG BANG THEORY IT AGREED WITH GENESIS IN TWO CRUCIAL ITEMS: 1-TIME, SPACE, & MATTER HAVE BEGINNING AS PER THE VERSE ABOVE, 2-THEY CAME OUT OF NOTHING.

BIG BANG: WHAT IS THE BIG DEAL?

EVOLUTION:
EVERYTHING FORMED
WITHOUT A CREATOR

The Big Bang is the Evolution grandfather meanwhile its offspring. Evolution **HIJACKED** every science, to support and promote itself, it necessitates:

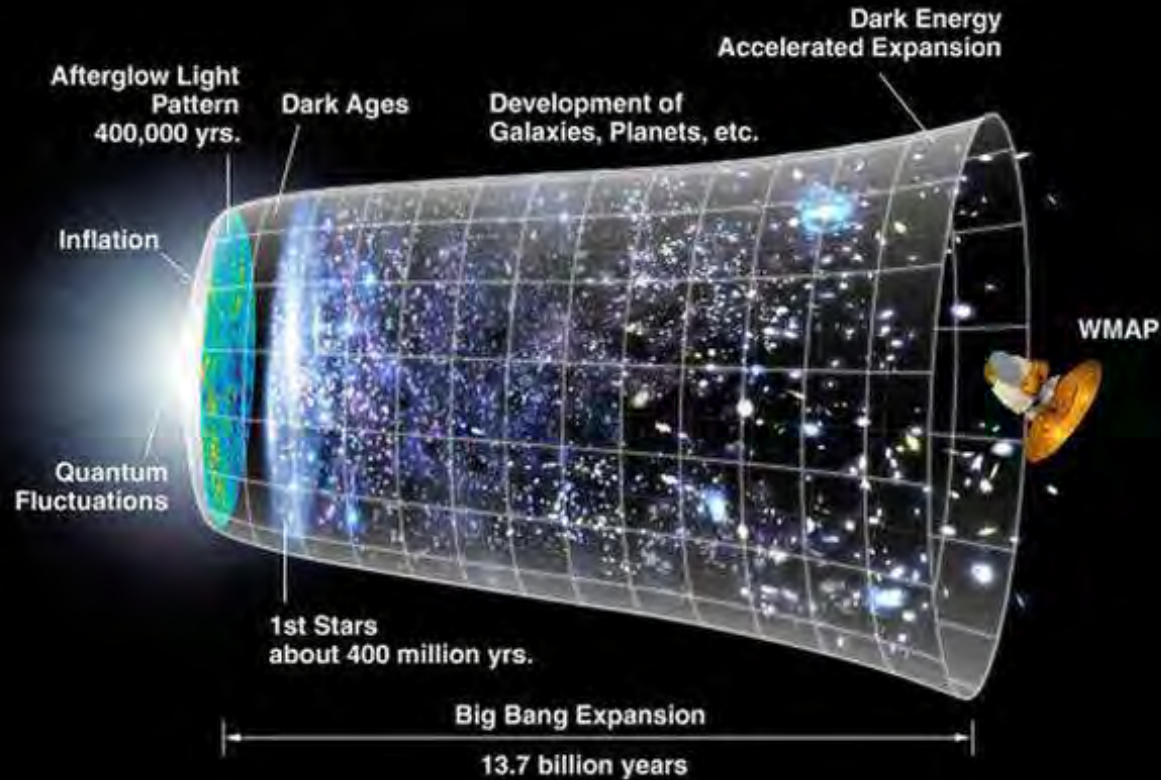

- Cosmic Evolution: Big Bang (👎).
- Chemical Evolution: Hydrogen & Helium and little Lithium into all elements (👎).
- Astronomic Evolution: Creation of cosmos (👎).
- Organic evolution: Life origin (👎)
- Macro evolution: Biology (👎).
- Micro evolution: Speciation (👍).

COSMIC & ASTRONOMIC EVOLUTION

This presentation deals with Cosmic & Astronomic Evolution as applied by the Big Bang to the solar system only.

Other evolutions are handled in different presentations.

RIGHT OUT OF THE GHETTO

Big Bang's beginning goes 180° against first and second laws of Thermodynamics. Einstein said, "Any theory must conform with thermodynamic laws otherwise trash it" (rephrased). Amen to Einstein.

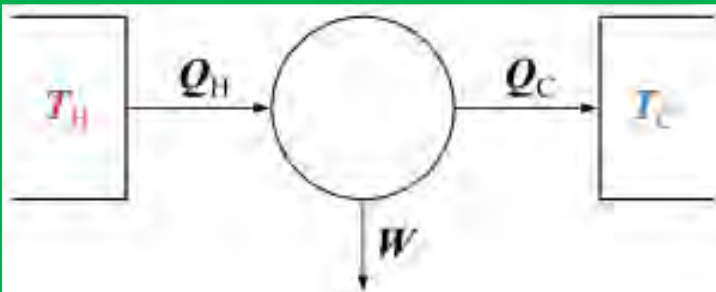

Dust and small clumps may form in space, however how these clumps "clump" together to form asteroids no one knows. On the contrary, if these clumps collide, they destroy each other.

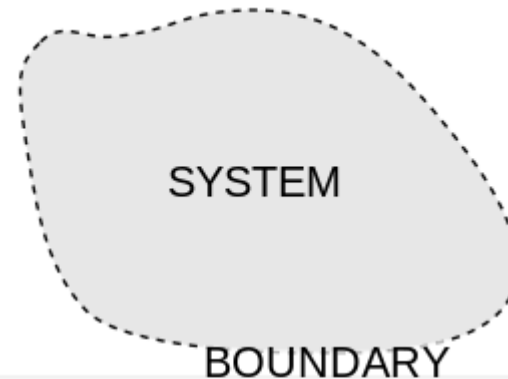

SIDE NOTE: THERMODYNAMIC LAWS

First: In a closed system, the sum of mass and energy stay constant during any process; **Conservation of energy & mass**

The **first law of thermodynamics** is a version of the law of conservation of energy, adapted for thermodynamic systems. The law of conservation of energy states that the total energy of an isolated system is constant; energy can be transformed from one form to another, but can be neither created nor

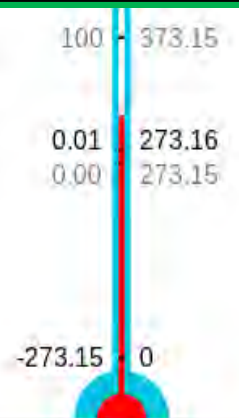

Second: In a closed system, **the entropy increases always** (i.e., the useful energy decreases always) during any process.

A **thermodynamic system** is a group of material and/or radiative contents. Its properties may be described by thermodynamic state variables such as temperature, entropy, internal energy, and pressure.

Third: The **entropy** of a system approaches a constant value as the temperature approaches **absolute zero**.

Absolute zero is the lowest limit of the thermodynamic temperature scale, a state at which the enthalpy and entropy of a cooled ideal gas reach their minimum value, taken as 0. The fundamental particles of nature have minimum vibrational motion, retaining only quantum mechanical, zero-point energy-induced particle motion.

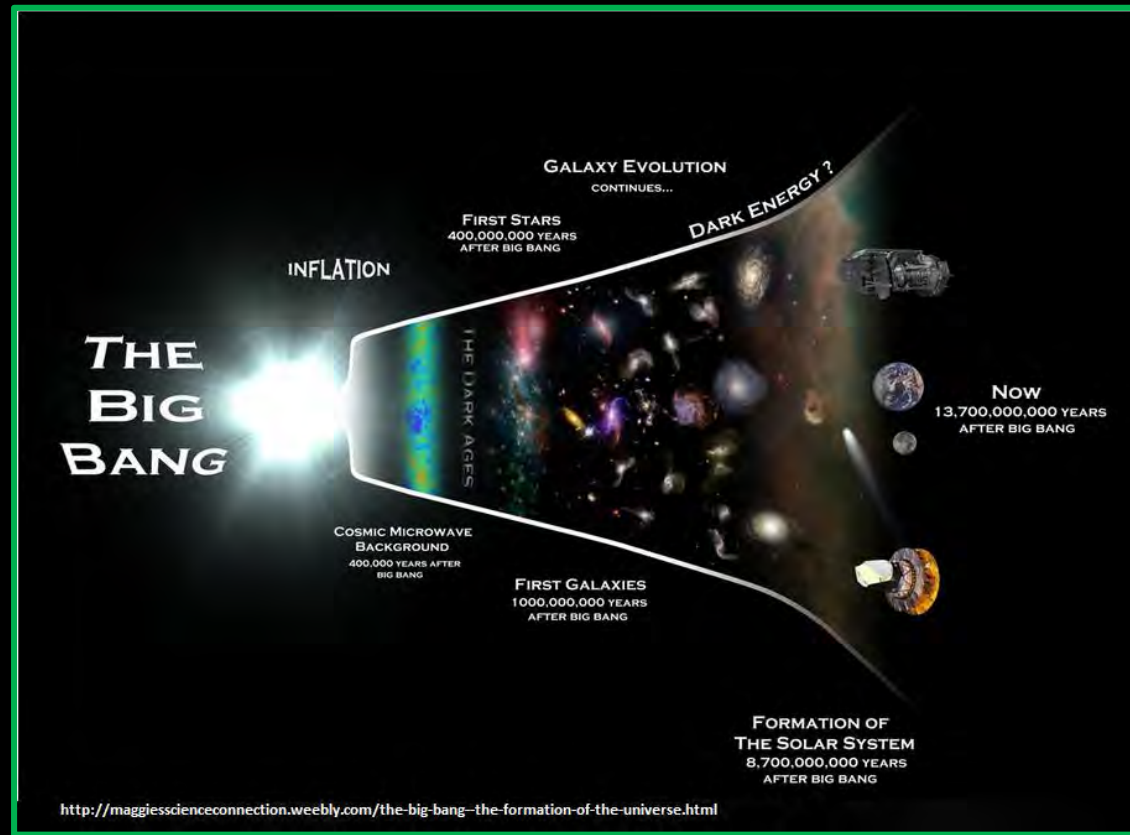

COSMIC & ASTRONOMIC EVOLUTION

SCIENCE CANNOT
PROVE OR DISPROVE
HISTORICAL SCENARIOS

Observable Science depends on the five senses: **touch, sight, hearing, smell and taste** to judge and conclude laws and facts. This kind of science is what produces transistors and space shuttles. On the contrary **Historical Science** relies on documentation from the contemporaries & its authenticity and infallibility, like in the case of historical scenarios and Creation. It is sort of forensic approach.

BIG BANG: NOTHING TO COSMOS

Timetable of forming the stars, galaxies, planets, and all cosmos according to the Big bang.

BIG BANG SUPPOSED SCENARIO

The start no time, no light, no space
just a dot of huge energy

It kept expanding and cooling

It exploded, in a trillionth of a sec into fog of energy the size of an orange

The energy formed trillions of subatomic particles : matter and anti-matter

In 100 sec becomes as big as our Solar System

Anti-matter was one billions of the stuff, matter and anti-matter annulated each other upon collision

BIG BANG AND THE SOLAR SYSTEM

We supposed to believe that “singularity” caused an infinitesimally small-sized cosmic egg which contains almost infinite energy exploded. The explosion took infinitesimal short time producing sub-particles which produced Hydrogen and Helium and traces of Lithium. This chunks of this mixture combined to produce dust which in turn combined to produce rocks which in turn combined to produce meteorites & asteroids which in turn combined to produce planetesimals which in turn combined to produce planets. Even if this scenario is what happened; where the cosmic egg came from and who caused the explosion? Clearly it is a belief issue and not scientific at all.

PLANETESIMALS
"LITTLE PLANETS"

THE SOLAR SYSTEM

We will start to discuss each solar planet and see if it complies with the Big Bang.

BACK IN MY DAY

**WE HAD NINE
PLANETS.**

SIR NEWTON & THE SOLAR SYSTEM

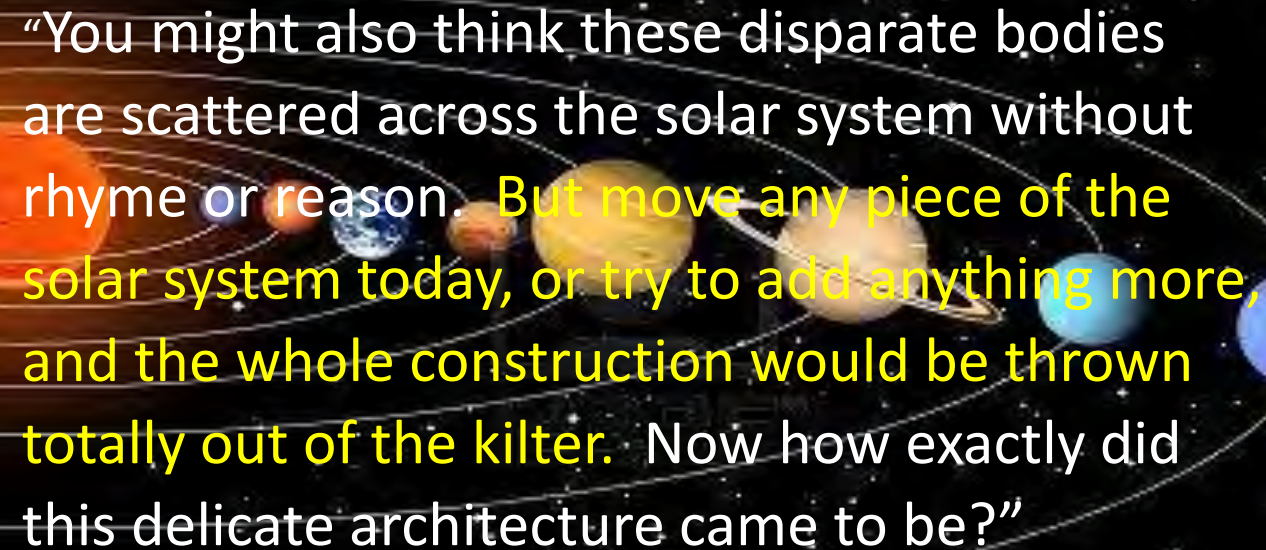

Newton on Nature:

Though these bodies may indeed continue in their orbits by the mere laws of gravity, yet they could by no means have at first derived the regular position of the orbits themselves from those laws. Thus, this most beautiful system of the sun, planets, and comets, could only proceed from the council and dominion of an intelligent and powerful Being.

General Scholium

HOW WAS THE SOLAR SYSTEM BUILT?"

“You might also think these disparate bodies are scattered across the solar system without rhyme or reason. But move any piece of the solar system today, or try to add anything more, and the whole construction would be thrown totally out of the kilter. Now how exactly did this delicate architecture come to be?”

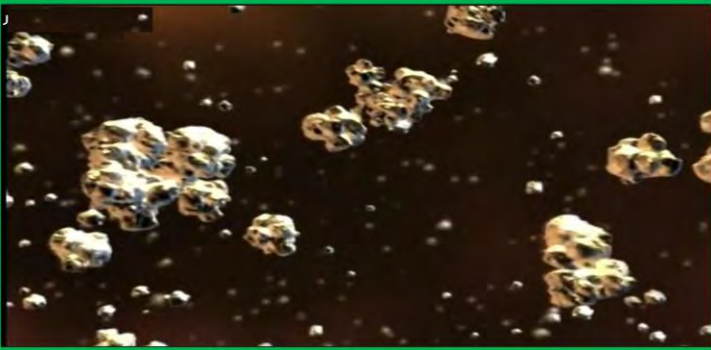

Richard Webb, New Science Jan. 2009, p.31

BIG BANG AND THE SOLAR SYSTEM

The big bang magic:

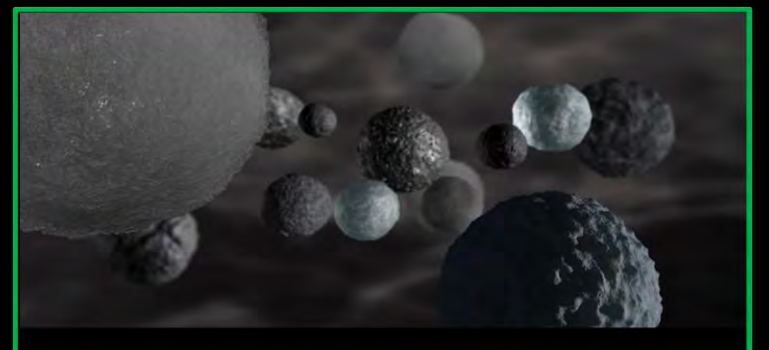

The sub-particles made particles then dust then rocks

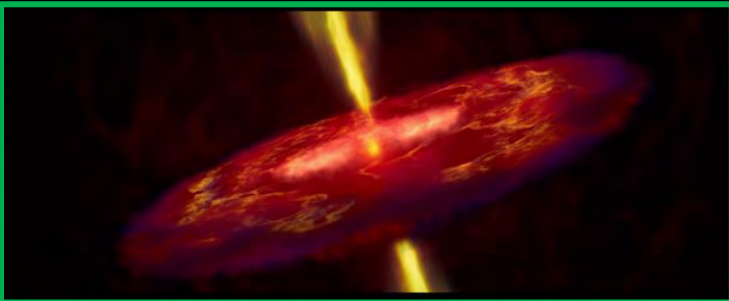

The rocks coalesced to make asteroids

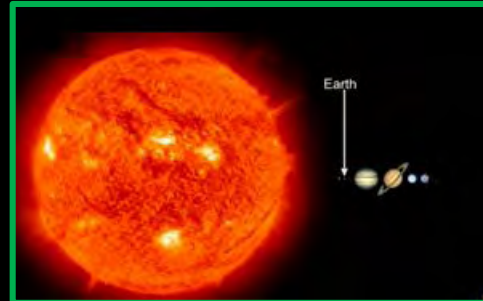

The asteroids got together to make planets

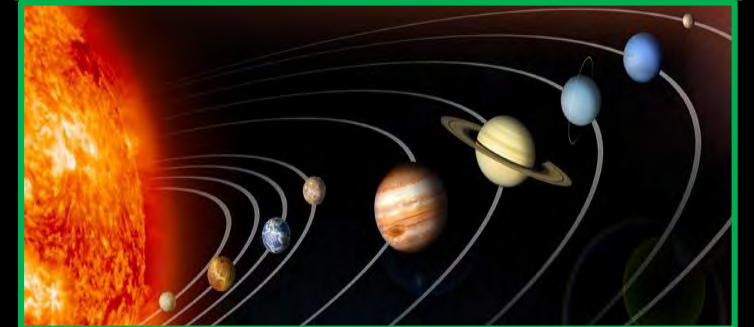

4.4 billion years ago starburst causing the cloud to collapse into spinning disk

In the disk center molecules are crushed to form proto star

Around the proto star asteroids combined to form the planets

The big bang magic:

Our sun is one of estimated 100 billion stars that form the Milky Way our, Galaxy.

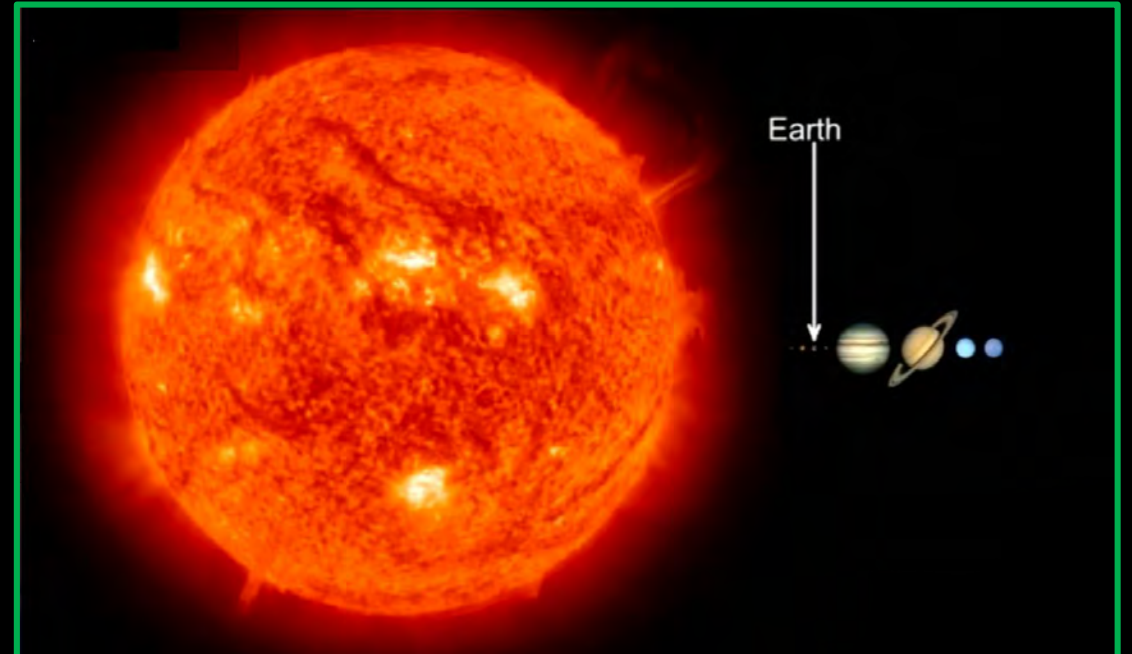

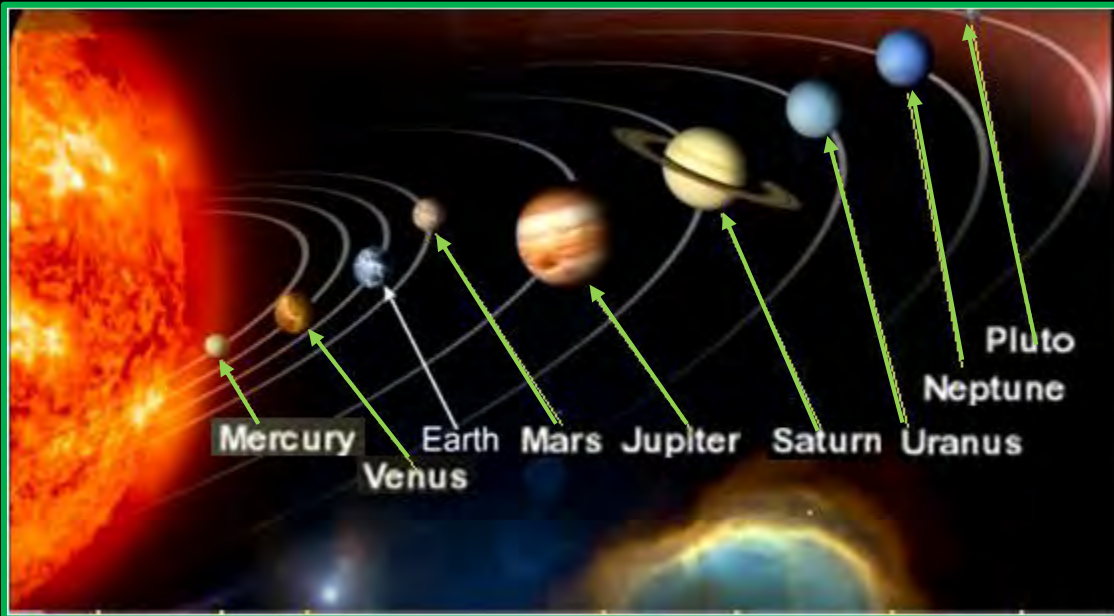

Countless stars formed different galaxies as this Whirlpool. There are estimated 100 billion Galaxies.

LET'S EXAMINE THIS OUT

Our solar system consists of the sun plus nine planets none of them like the other despite being, according to the big bang, made of the same cloud.

We will see how the big bang fails right from the beginning and every step of the way. We will see planet by planet how it defies the big bang, just set tight.

THE TERRESTRIAL PLANETS
"TERRA" = EARTH

MERCURY CORE

Closest to the sun, 800° to -200° F, Mariner 10 space probe checked it 1974, 1975.

Problems in contrast with Evolution:

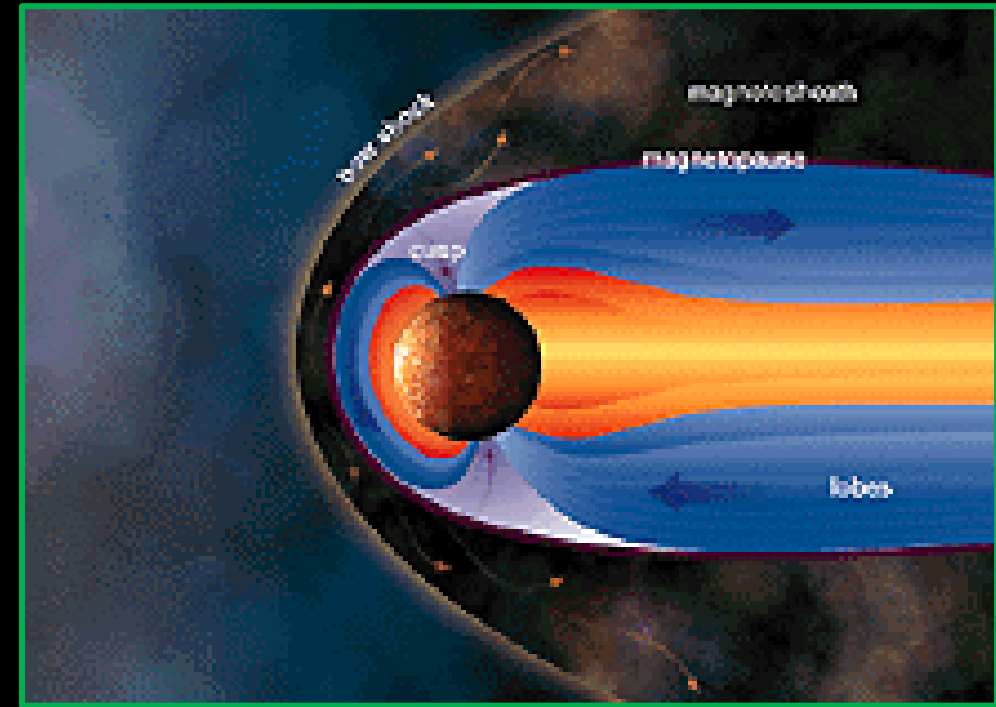

- So dense, 40% iron core?.
- To solve the problem: large asteroid hit it
- The impact blew away the light stuff
- There isn't any proof
- If it didn't happen

MERCURY MAGNETIC FIELD

26

- **Mercury has magnetic field**
- Most magnetism sources can't last billions of years.
- The only source that last is **Dynamo deep inside the planet.**
- This requires hot liquid metal moving inside the planet producing electric current and magnetism.
- But Mercury is so small and should have frozen solid ions ago.
- Solution: the metal core include Sulphur mixed with the iron thus slowing its solidification.
- This brings a bigger problem, the big bang states **Sulphur can't form that close from the sun.**

http://www.windows2universe.org/mercury/mercury_il.html&edu=high

MERCURY'S VIOLATIONS

- Mercury is a small planet, but it defies the big bang. As it is stated in the bible:
- BUT GOD HATH CHOSEN THE FOOLISH THINGS OF THE WORLD TO CONFOUND THE WISE; AND GOD HATH CHOSEN THE WEAK THINGS OF THE WORLD TO CONFOUND THE THINGS WHICH ARE MIGHTY;

- EVOLUTION SAYS IT CAN'T BE DENSE, BUT IT IS
- EVOLUTION SAYS IT CAN'T HAVE A MAGNETIC FIELD, BUT IT DOES
- TRYING TO RESCUE EVOLUTION FROM THE FACTS JUST MAKES THE PROBLEM WORSE.

THE EVOLUTION LIFE SAVER DAM ASTEROID IMPACT

The magic bullet for all cosmology evolution problems as we will see: **A large impact of an estranged asteroid millions of years ago.** It resurfaces, blows away atmospheres, blows or creates magnetic fields, splits, ..etc. it even kills dinosaurs on planets. It worked tirelessly in the solar system to keep evolutionists happy.

VENUS, EARTH'S LITTLE SISTER

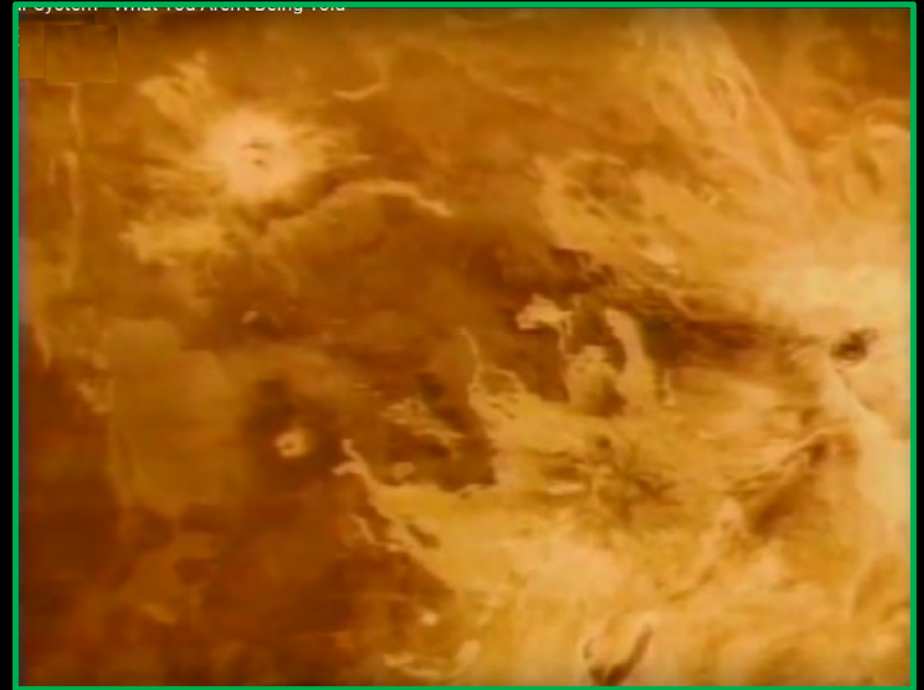

- Hottest planet **900° F** due to greenhouse effect of its atmosphere, **90 atmospheric** pressure.
- According to Evolution **Venus and earth are twin sisters**: formed the same time, process, and material and about the same place.
- It does not look a bit like the earth: **surface is covered by volcanic lava, not a drop of water, rains sulphuric acid, no tectonic plates, no magnetic field, no moon.**
- Evolutionist say it did have moon, but the same dam asteroid did it again and knocked it away.

VENUS

VENUS YOUNG SURFACE

- Venus has another problem; the surface looks quite young and there are no signs of billions of years of erosion or chemical weathering.
- Solution: the whole planet somehow for unknown reasons had a **resurface job** made by volcanic lava which covered it all 500 million years ago (because it has 1000 large craters).
- Is there any evidence? NO, but it must had happened because we know evolution is true 😊.

VENUS' VIOLATIONS

ONE OF A KIND!

EARTH, THE PRIVILEGED

"In the beginning God created the heaven and the earth."

Genesis 1:1. These are the first words in the Bible. God announces here the utmost importance of the earth. As a matter of fact God dedicated the first two chapters in the Bible for earth, man, and all the animals, birds, plants (51 verses) and just one verse for the rest of the universe: **"And God made two great lights; the greater light to rule the day, and the lesser light to rule the night: he made the stars also."**

Genesis 1:16. Moreover the Bible, the word of God, is a wonderful symphony of God love to the man and His sacrifice to save the man when he sinned. We are discovering the privileges God bestowed on the earth and we are starting to get a glimpse of His mind boggling design of the whole universe for the comfort of the man. We will touch upon few of these privileges in the next few slides. These are called Anthropic Principle.

The Earth is the ONLY planet in the sun's habitable zone!

EARTH IS UNIQUELY DESIGNED

PRINCIPALS OF THE ANTHROPIC PRINCIPLE

These are cosmological principle that theories of the universe are constrained by the necessity to allow human existence. They are about 3 dozens. Can mindless haphazard explosion produce such synergy? Here is a summary of the major ones:

- **Oxygen Level** 21% right in the middle between 15% suffocating level and 25% explosive level.
- **Atmospheric Transparency** just enough to protect against harmful cosmic radiations and small enough to pass the useful sunlight.
- **The atmospheric composition** of precise levels of nitrogen, oxygen, carbon dioxide and ozone are in themselves Anthropic constants in perfect ratios for life.
- **Moon-Earth Gravitational Interaction** creating moderate ocean tides producing ocean currents and preventing ocean stagnation. It stabilizes the earth tilt axis and thus the climate fluctuations are reasonable. (there are a lot more benefits will be touched upon in few slides later)-
- **Carbon Dioxide level:** small enough to prevent greenhouse effect and big enough to maintain efficient plant photosynthesis.
- **Gravity:** If the gravitational force were altered by 10^{-40} %, our sun would not exist.
- **Centrifugal Force:** precisely balances the sun gravitational forces and thus the earth (and planets) stay in orbits around the sun.
- **Rate Of Expansion** is precise within 10^{-120} , if less the universe collapses, if more the universe ends in heat death.

EARTH, THE PRIVILEGED

PRINCIPALS OF THE ANTHROPIC PRINCIPLE

- **Speed Of Light** 299,792,458 meters per second: All laws of physics are expressed in terms of light speed. Any change in this speed will throw off the laws and preclude life on earth.
- **Water Vapor Levels:** Just enough to support livable greenhouse, little deviation will cause unlivable cold or hot temperatures.
- **Jupiter:** Its gravity is a virtual cosmic vacuum cleaner; without it the earth would be bombarded by comets.
- **The Earth's Crust thickness:** if too thick more Oxygen would be absorbed leaving insufficient Oxygen for living, if thinner volcanic activity increases.
- **The Earth's Rotation:** If too fast the humans and animals and plants won't have enough resting time, if too slow the days would be too hot and nights too cold for life.
- **Axis Tilt** supports reasonable seasonal climate variations. Bigger angle will cause severe seasonal climate differences, less angle will decrease the difference in seasonal climate and thus interrupts many animal life cycles and even plant varieties.
- **Atmospheric lightning:** Too much will cause excessive fires, too little less more nitrogen will be absorbed by the soil lowering its fertility.
- **Seismic Activity:** Too much will increase death, too little will impede cycling of ocean floors and river runoff nutrients.

EARTH, THE PRIVILEGED

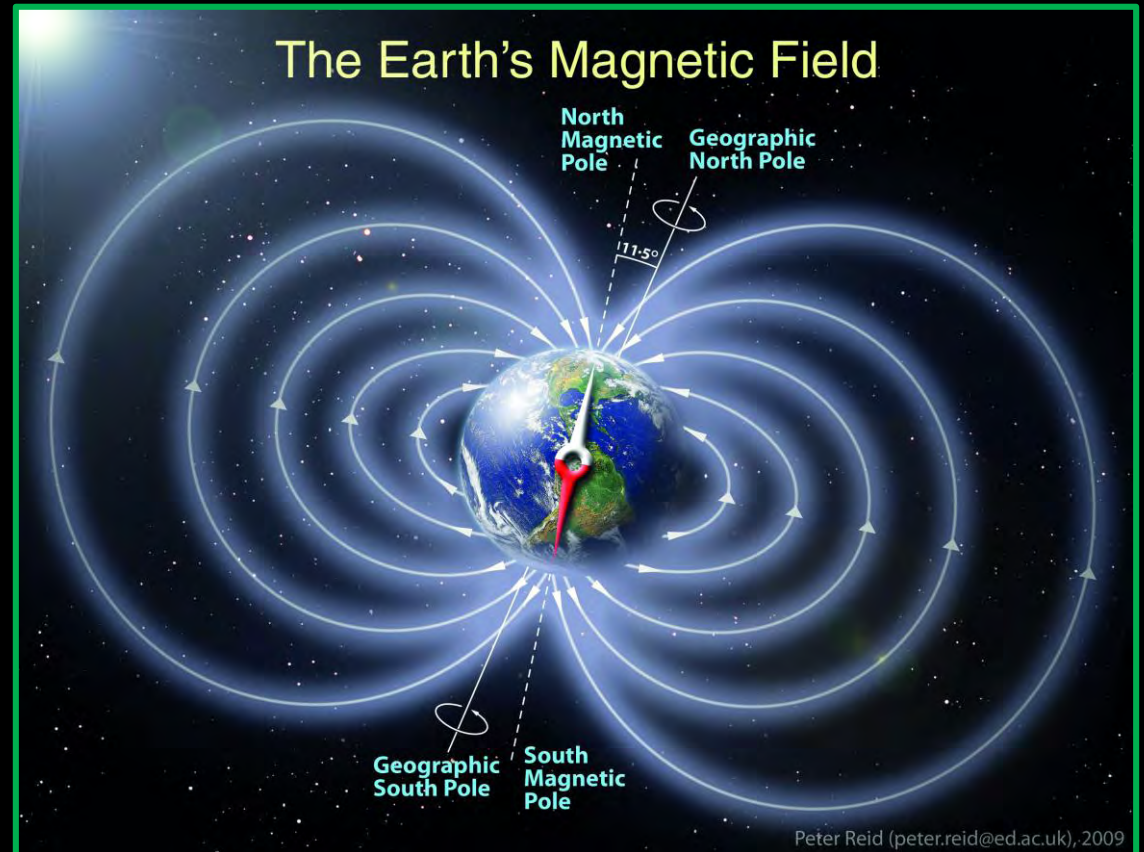

- Is this beauty 4.5 billion years old as evolutionists say? we will discuss the age In future lectures.
- Does it otherwise comply with the Big Bang? Let's find out

Please click on the loudspeaker to see the play button

EARTH'S MAGNETIC FIELD

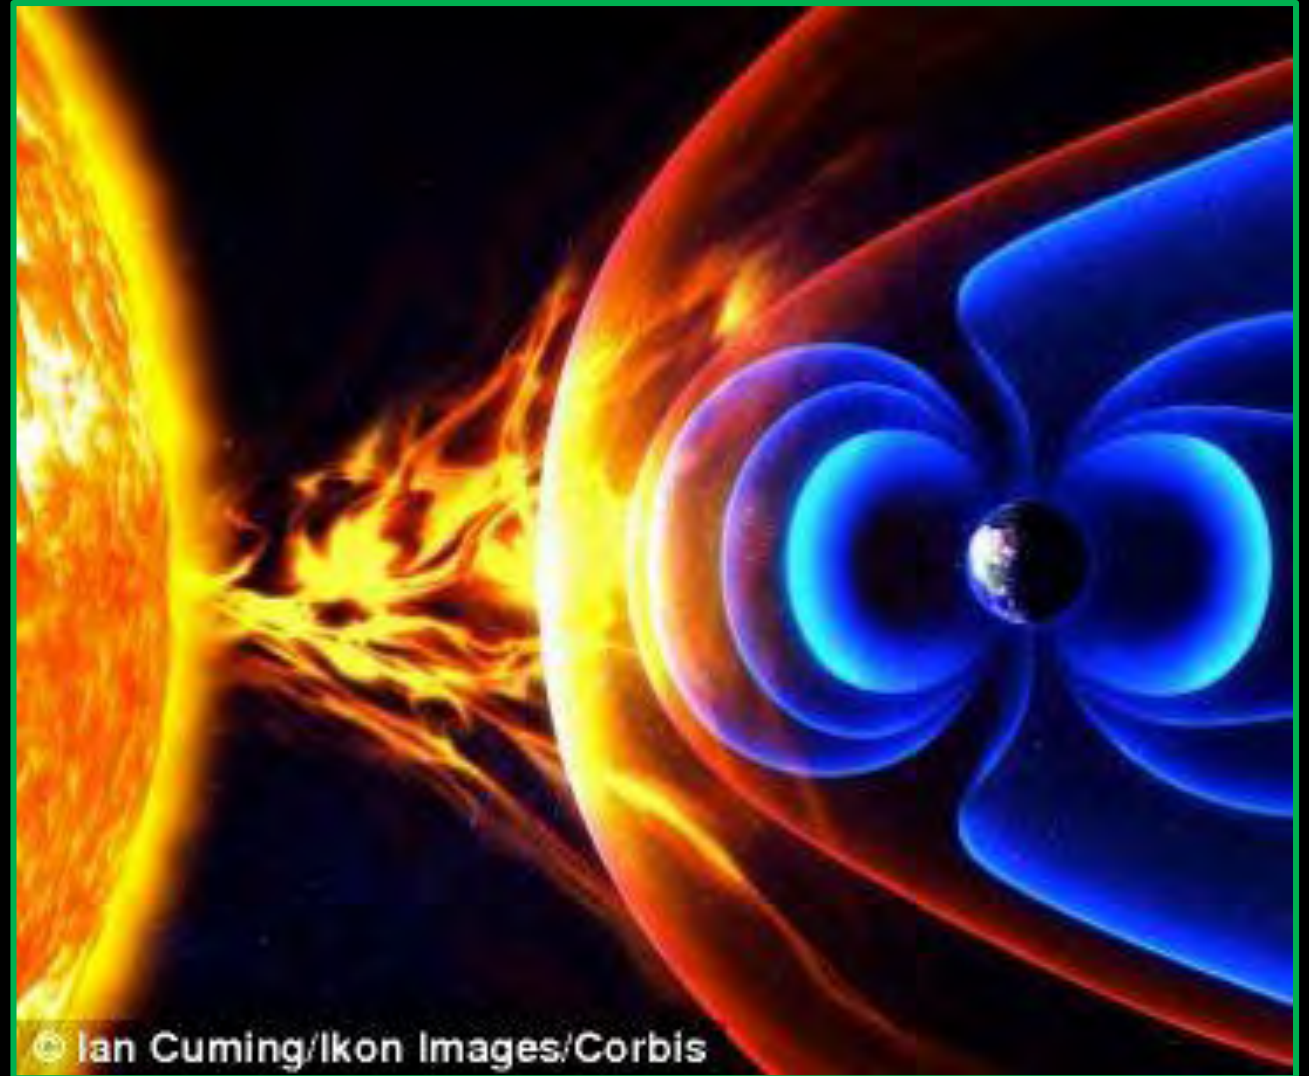

- “The mechanism for generating the geomagnetic field remains one of the central unsolved problems in geoscience” Quote: National Geomagnetic Initiative on Geosciences
- The magnetic field energy half life-time is 1400 years. This means it was double its current energy 1400 years in the past.
- The earth can't be older than 20,000 years otherwise the magnetic field in the past would prevent life.
- The billions of Big Bang flunk again!

EARTH'S MAGNETIC FIELD

38

- The magnetic field protects us from solar & cosmic radiations.
- Perfect atmosphere for breeze w/o danger of fires.
- Perfect rotation speed.
- The earth's orbit is unusually nice and circular giving us stable climate.

© Ian Cuming/Ikon Images/Corbis

EARTH IS UNIQUELY DESIGNED

- The rotation **axel** is tilted 23.5 degrees allowing for **moderate seasons and more vegetation varieties**.
- “¹⁸ For thus saith the LORD that created the heavens; God himself that formed the earth and made it; he hath established it, he created it not in vain, he formed it to be inhabited: I am the LORD; and there is none else. “ Isaiah 45:18

EARTH, UNIQUELY DESIGNED

- 70% of the earth surface is covered by water in conflict with the evolutionary model because light material like water can not form close to the sun.
- Evolution defense: you guessed it, the dam asteroid did it again.
- Unfortunately for Big Bang we found that the asteroids' water is chemically very different from our water, it has lot deuterium which is extremely rare on earth.

EARTH VIOLATIONS

41

- **UNIQUELY DESIGNED:** AXEL TILT, ROTATION SPEED, CLOSE TO CIRCULAR ORBIT, ATMOSPHERE, ...ETC.
- SHOULDN'T HAVE **WATER.**
- **MAGNETIC FIELD** CAN'T BE MILLIONS OF YEAR OLD

OUR AMAZING MOON

The moon is a central component in God's design to thrive human life on the earth. For a starter:

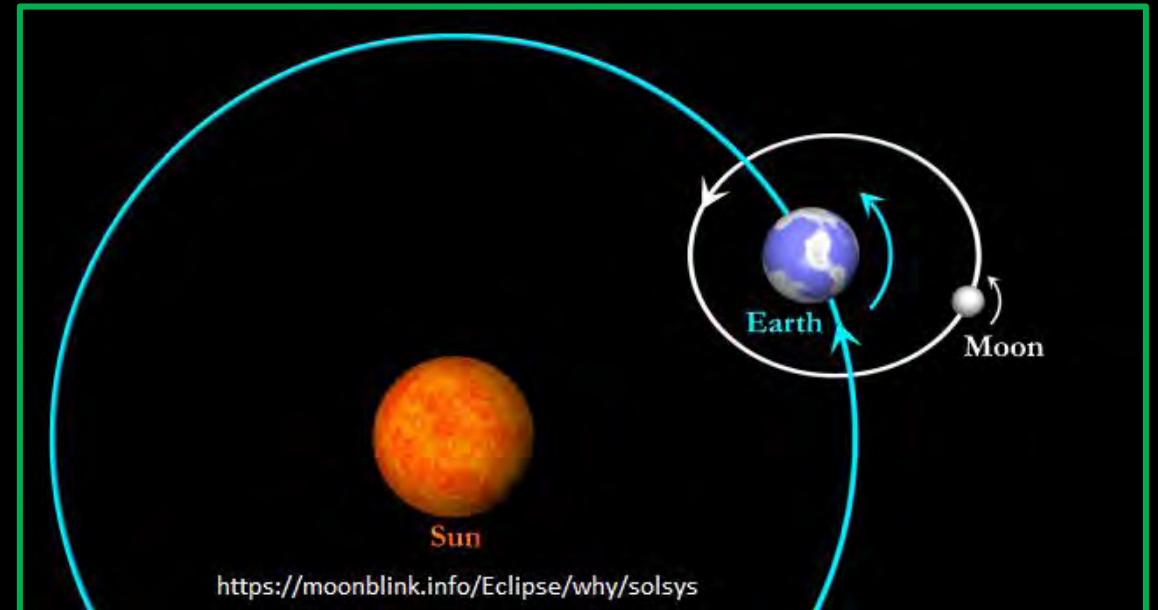

- It is not only beautiful but more importantly like the earth it was uniquely designed just for us.
- Its gravity causes tides which are not only crucial to circulate the oceans stimulating sea life but also creating ocean currents. These ocean currents moves large amount of heat from the warm tropical areas to the frigid poles thus protecting us from extreme climate fluctuations.
- Its distance is optimum for moderate tides.
- Its size and location between the earth & the sun enables pre-determined solar eclipses which enables us to study the sun corona and getting plethora of sun knowledge.
- Our solar system includes (so far) 163 moons, none of them has this character to enable eclipses to their planets. Our moon has the largest moon-to-planet size to warrant the marvelous effects on the earth. It is also closer than most large planetary moons.

OUR AMAZING MOON

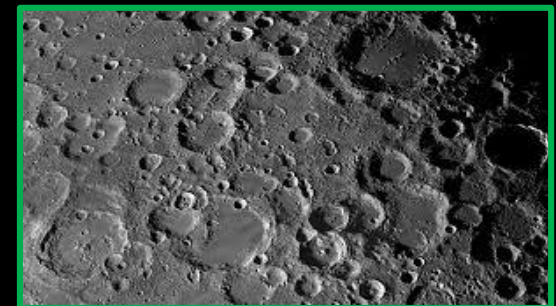

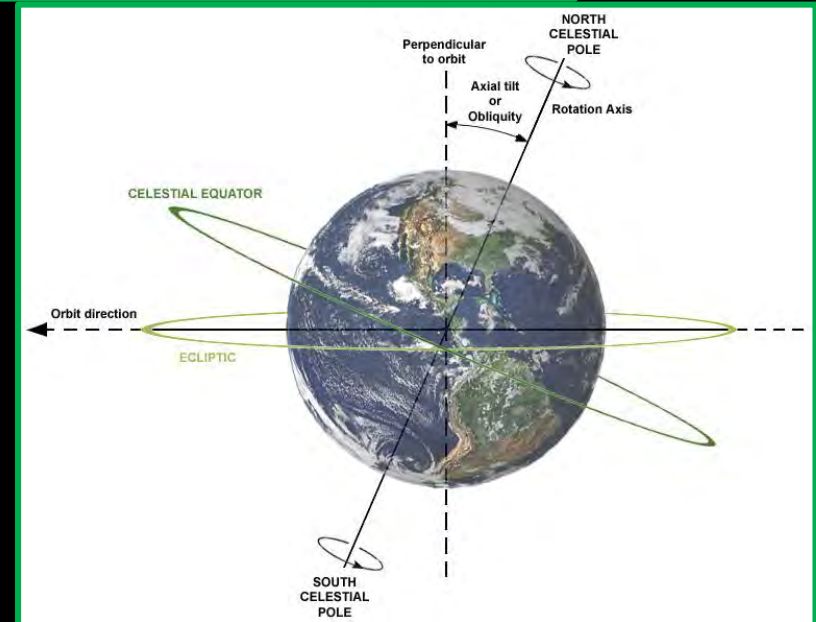

- The moon light enables **nocturnal** (active at night) creatures like the night owls to **find food**. The **reflected light is only 12%** of the sunlight that comes to the moon, just enough for nocturnal creatures to see without disturbing others who rest at night.
- **Moon gravity helps stabilizing the tilt of the earth's spin axis**, protecting the earth from severe climate swings. According to evolutionists increase of 2.5° of the axis caused ice age(s) "millions of years" ago (Milankovitch theory). Without the moon this tilt angle can vary up to 90° rendering earth uninhabitable.
- **The near circular earth's orbit is due to:** (A)The unique **moon's relatively large size**, and (B)The unique "almost" **ecliptic** (same earth's orbit around the sun) **moon's orbit** (most other moons' orbits are elliptic, i.e., in its planet elliptic plane).

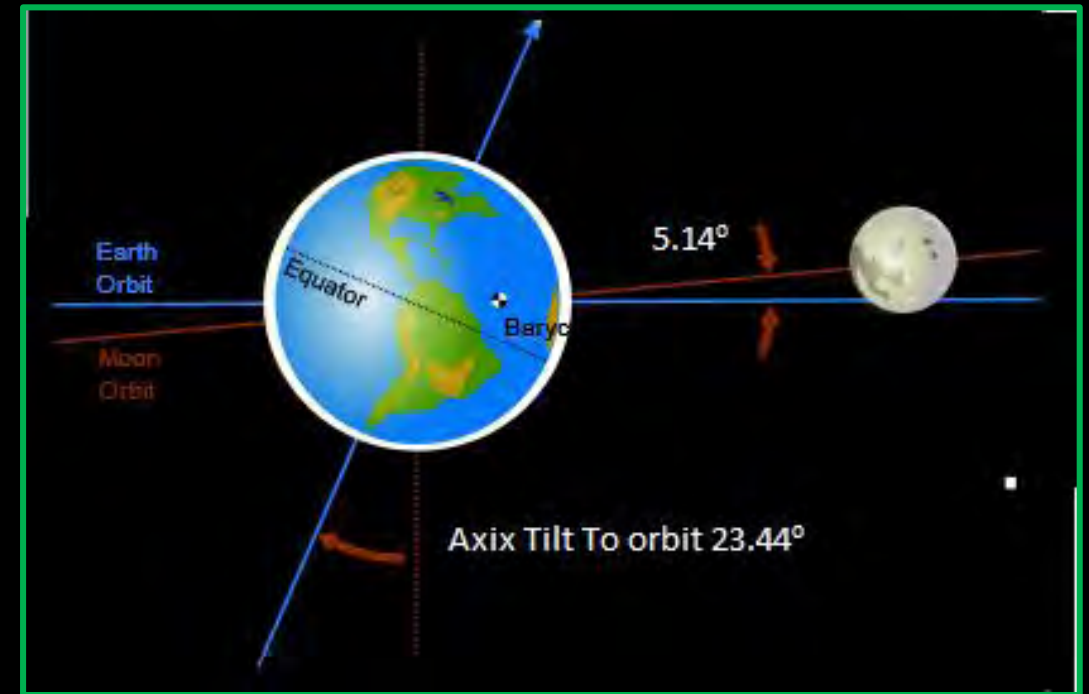

OUR AMAZING MOON

- The earth's **spin axis tilt of 23.5°** , which is stabilized by the moon as shown above, produces favorite wind pattern changes responsible directly **of wide distribution of the rain**. If this angle is decreased just by half a degree, we lose this distribution leading to widespread of desert lands.
- The moon acts as "last" **protection for the earth from asteroids, meteorites, and comets** as Jupiter and Mars do but on a smaller scale. This is supported by the fact that the moon's far side which faces deep space always is the most cratered surface in the whole solar system.

OUR AMAZING MOON

Our amazing moon, like the rest of the solar system, is not a haphazard celestial body that is produced by some fictitious explosion (big bang) blowing nothing into gigantic universe (or countless universes.) It is like the rest of the universe: an amazing piece of ingenious design created by a loving personal God for His beloved child: the human. Let's celebrate His ingenuity, love, care, and most of all His fatherhood to us.

OUR AMAZING MOON

The moon is young too, its surface tells so.

- **Maria:** Large dark areas on the surface of the moon. They were caused by severe impacts which cracked the moon crust and caused lava to ooze out and fill them then it hardened therefore they are smooth and lower than the surrounding areas.
- Evolutionists say it took 500 million years after the large impacts which crack the moon crust for lava to ooze out. During this long time many new small impacts caused craters. When the lava came out finally those smaller craters were covered by lava still their imprints show on the surface of the lave. These imprints are called ghost craters.
- Realistically, the lava would come at most 1-2 weeks after the strong impacts and not millions of years.
- Because the moon surface is marred by both craters and ghost craters while not many impacts take place now it is safe to say the impacts were much frequent at early times.
- Remember that the moon has no atmosphere consequently no erosion. Therefore the craters stay for good.

OUR AMAZING MOON

Recap:

- These ghost craters are craters that are sticking up from beneath the Maria.
- It means they were smaller impacts after the large impact BUT before the lava oozed out. Which indicates that earlier on there were more impacts than now. We saw this on Venus and Mercury.
- Therefore the planets and moons are lot younger than it has been told.

MADE IN HEAVEN

"¹⁴ And God said, Let there be lights in the firmament of the heaven to divide the day from the night; and let them be for signs, and for seasons, and for days, and years: ¹⁶ And God made two great lights; the greater light to rule the day, and the lesser light to rule the night: he made the stars also. ¹⁷ And God set them in the firmament of the heaven to give light upon the earth, ¹⁸ And to rule over the day and over the night, and to divide the light from the darkness: and God saw that it was good. ¹⁹ And the evening and the morning were the fourth day." EVOLUTIONISTS THEORIES OF MOON FORMATION

Fission theory:

- The earth was spinning too fast **once every 2.5 hrs.**
- **A piece spun off it and became the moon.**
HOWEVER:
- Moon rocks are **different, they are deficient in iron..**
- The **energy to slow** the earth to 24 hrs. a day would increase the earth temp by **1000°C evaporating away all the oceans.**

FLUNKS

Nebula theory:

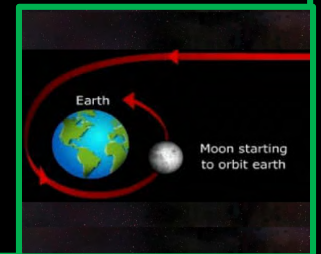

- Both the earth and moon were **formed from the same dust cloud** (nebula),
HOWEVER:
- Lunar material is **different**
- **Beside the problems mentioned early to get planets out of dust to start with.**

FLUNKS

Capture theory:

- The moon **was wondering** in the sky, got close to the earth, the **earth captured it** in an orbit around herself. **HOWEVER:**
- It would've been **accelerated** by the gravity.
- Resulting it **either hits the earth destroying each other or it would be spun flying by away from the earth.**

FLUNKS

BIG BANG FORMATION THEORIES OF THE MOON

52

- So **none** of the three theories can **work**.
- But we know that evolution happened!
- So the new theory calls for the same dam asteroid, it is right because simulation proved it:
 - Simulation **proves it could happen** like this.
 - Simulation has **very precise parameters and numerous conditions**, creation easier to believe.
 - Moon stones contain water, how it didn't evaporate.
 - The hit must be unrealistically so gentle and master minded.

"IN SPITE OF EVERYTHING THAT WE HAVE LEARNED DURING THE LAST FEW YEARS, WE STILL CANNOT DECIDE BETWEEN THESE THREE THEORIES. WE STILL NEED MORE DATA AND PERHAPS SOME NEW THEORIES BEFORE THE ORIGIN OF THE MOON IS SETTLED TO EVERYONE'S SATISFACTION."

Peter Noerdlinger, Ph.D., quoted in *New Scientist*, 23 January 2007, page 16

"IT'S HARD TO IMAGINE A SCENARIO IN WHICH A GIANT IMPACT MELTS, COMPLETELY, THE MOON, AND AT THE SAME TIME ALLOWS IT TO HOLD ONTO ITS WATER...THAT'S A REALLY, REALLY DIFFICULT KNOT TO UNTIE."

Erik Hauri, a geochemist at the Carnegie Institution's Department of Terrestrial Magnetism in Washington, D.C., as quoted in <http://www.npr.org/templates/story/story.php?storyId=92383117>

BIG BANG FORMATION THEORIES OF THE MOON

Rocks brought from the moon contain water, collision would evaporate it.

This location shows possible volcanic activities (temporary glow & flashes of light), i.e., the moon is young and still active.

Seems to be volcano defying Big Bang, the moon got to be old cold and dead, it seems to be young.

The Grand Canyon of Mars

MARS, FEROCIOUS LIKE TEENS

Dry chasms, gullies, layer deposits, guizers tracks, ...

Water too but not as liquid, as vapor in its atmosphere and ice at the poles and underground only

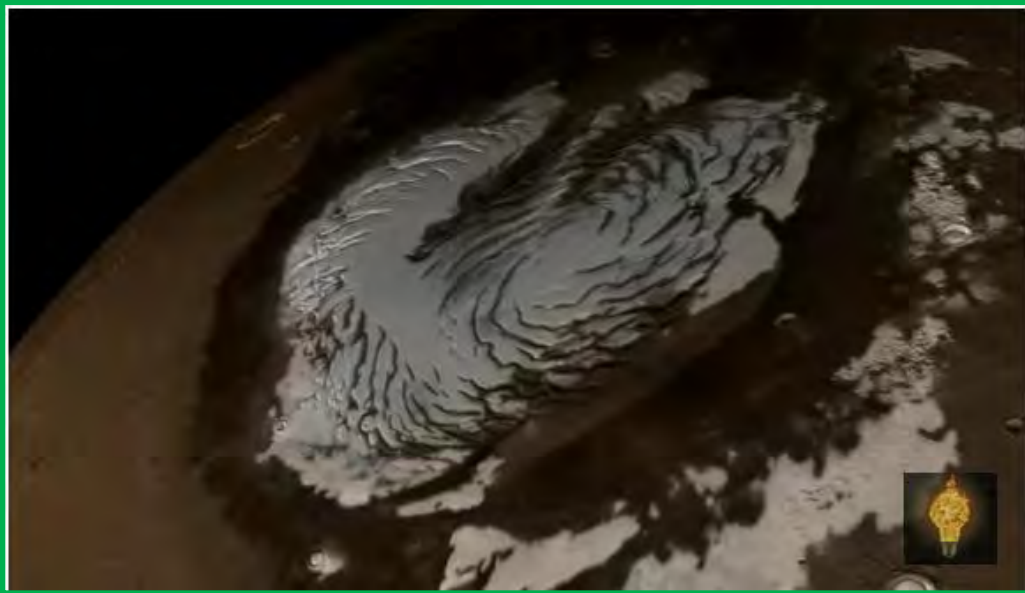

LIQUID WATER ON MARS

- IMPOSSIBLE TODAY
- THE ATMOSPHERE IS TOO THIN
- LIQUID WATER WOULD EITHER EVAPORATE OR FREEZE QUICKLY

MARS, FEROCIOUS LIKE TEENS

Even if volcanos on Mars melted the underground ice it would evaporate quickly because the atmosphere is very thin.

Evolutionists **look disparately for water** on Mars. They seem to think extra-terrestrial life proves evolution and godless creation

EVOLUTIONISTS
CONTINUE TO SEARCH
FOR WATER ON MARS.

WATER IS NECESSARY
FOR LIFE.

MARS IS LIFELESS

Evolutionists try disparately to prove water on Mars as if water alone enough to produce life. LIFE NEEDS LOT MORE THAN JUST WATER, MOST IMPORTANTLY A CREATOR TO CREATE IT.

Louis Pasteur disproved the idea of "Spontaneous Life Generation" in 1980's

MARS IS LIFELESS

"IT IS EXTREMELY IMPROBABLE THAT PROTEINS AND NUCLEIC ACIDS, BOTH OF WHICH ARE STRUCTURALLY COMPLEX AROSE SPONTANEOUSLY IN THE SAME PLACE AT THE SAME TIME. YET IT ALSO SEEMS IMPOSSIBLE TO HAVE ONE WITHOUT THE OTHER.

"AND SO, AT FIRST GLANCE, ONE MIGHT HAVE TO CONCLUDE THAT LIFE COULD NEVER, IN FACT, HAVE ORIGINATED BY CHEMICAL MEANS."

Leslie E. Orgel, "The Origin of Life on the Earth,"
Scientific American, vol. 271, October 1994, pp. 77-83

"MORE THAN 30 YEARS OF EXPERIMENTATION ON THE ORIGIN OF LIFE IN THE FIELDS OF CHEMICAL AND MOLECULAR EVOLUTION HAVE LED TO A BETTER PERCEPTION OF THE IMMENSITY OF THE PROBLEM OF THE ORIGIN OF LIFE ON EARTH RATHER THAN TO ITS SOLUTION.

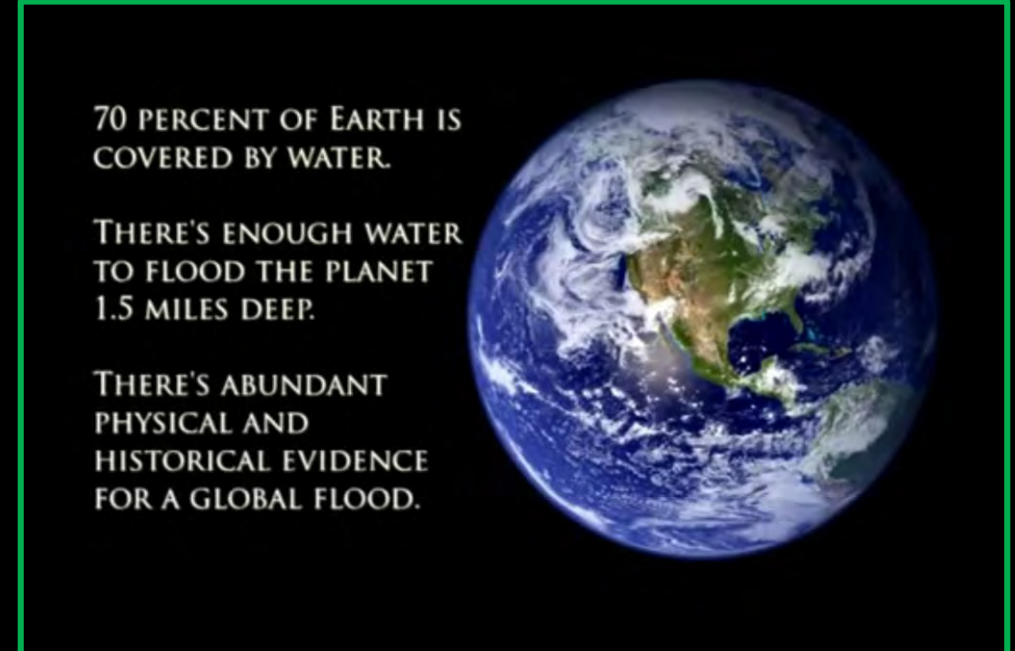

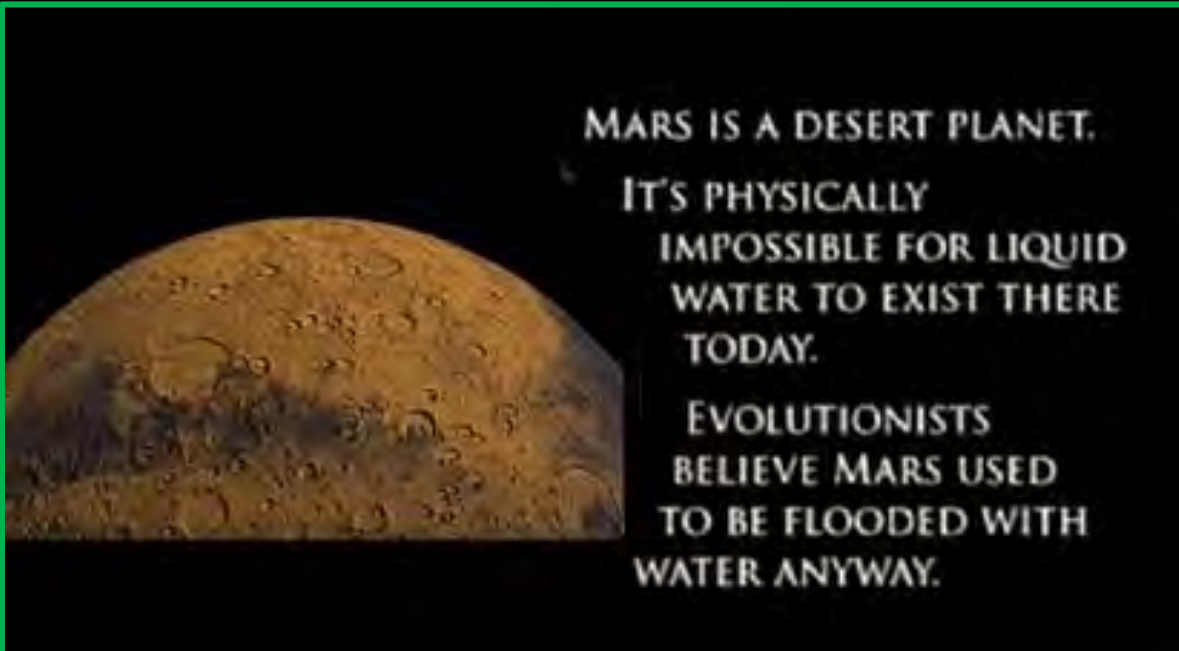

"AT PRESENT, ALL DISCUSSIONS ON PRINCIPAL THEORIES AND EXPERIMENTS IN THE FIELD EITHER END IN STALEMATE OR IN A CONFESSION OF IGNORANCE."

Professor Dr. Klaus Dose,
"The Origin of Life: More Questions than Answers," *Interdisciplinary Science Reviews*,
vol. 13, no. 4, pp. 348-356

MARS IS LIFELESS

Mars **can't have water now**, however evolutionists disparately relate its landscape to **water catastrophes**

The earth has water enough to cover it for 1.5-mile-deep, however evolutionists deny the Grand Canyon was caused by water catastrophe because the Bible says so, what a hypocrites

And the solution is: the
same dam asteroid hit
poor Mars and expelled
all the water

MARS IS LIFELESS

Wheel of Spirit, small rover landed on Mars, Nature magazine on 12/11/2007 reported: "It hits on life on Mars". What for speculation. What did Spirit find? Only a little patch of sandy material that Might be:

a) silica b) have formed from volcanic funeral c) Volcanic products on earth sometimes have bacteria d) therefore Bingo, we found life on Mars!

JUPITER IS STORMY

Size comparison

Jupiter

Saturn

Uranus

Neptune

Earth

Beautiful intricate clouds, huge storm system called red spot could be as old as Jupiter, huge electoral storms: IT IS VIOLENT!

JUPITER IS STORMY & QUICK

The Red Spot storm is bigger than the entire earth itself

Jupiter violates the big bang just like his sisters. It spins once every just 10 hrs. Needs huge energy, the evolution model can't supply it.

"WE CAME TO THE CONCLUSION... THAT IF YOU ACCRETE PLANETS FROM A UNIFORM DISK OF PLANETESIMALS, PROGRADE ROTATION JUST CAN'T BE EXPLAINED.' THE SIMULATED BOMBARDMENT LEAVES A GROWING PLANET SPINNING ONCE A WEEK AT MOST, NOT ONCE A DAY."

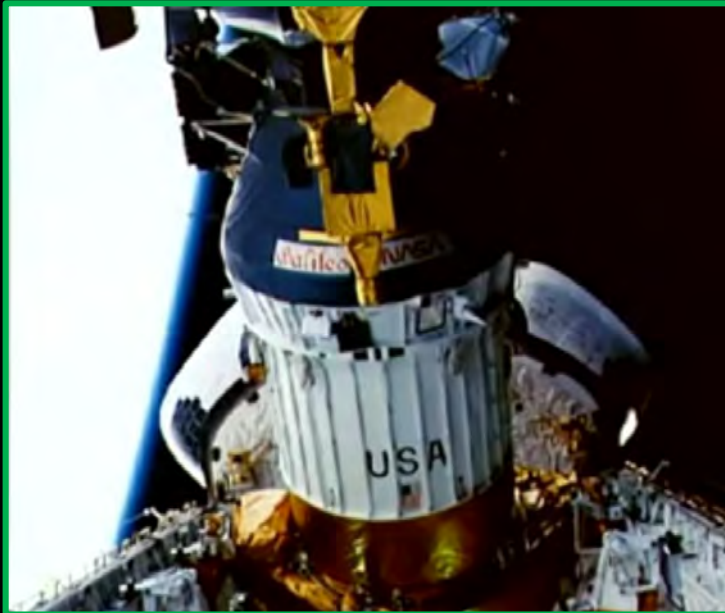

Richard A. Kerr, 'Theoreticians Are Putting A New Spin on the Planets', *Science*, Vol. 258, 23 October 1992, p. 548

JUPITER VIOLATES BB TOO

Evolution model predicted Jupiter will lack argon, krypton, xenon, and others. It turned out it has lots of these elements. Philip Ball, Giant Mistake, Nature Science update 11/18/1999 stated "we know next to nothing how or where it (Jupiter) formed"

The evolution model requires large core at least 10 times the earth mass. Galileo mission found its core, if any, can't be more than 3 times.

Scientists calculated time to form Jupiter out of gas and dust at least 10 million years. Some calculate 100 million years. However they state such a disk won't last 5 million years around the sun. This means according to evolution Jupiter shouldn't exist at all.

JUPITER'S MOONS

"TALK ABOUT A MAJOR EMBARRASSMENT FOR PLANETARY SCIENTISTS. THERE, BLAZING AWAY IN THE LATE EVENING SKY, ARE JUPITER AND SATURN - THE GAS GIANTS THAT ACCOUNT FOR 93% OF THE SOLAR SYSTEM'S PLANETARY MASS - AND NO ONE HAS A SATISFYING EXPLANATION OF HOW THEY WERE MADE."

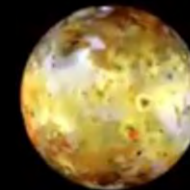

Richard A. Kerr, 'A quickie birth for Jupiters and Saturns',
Science, Vol. 298, 29 November 2002, 1698-9

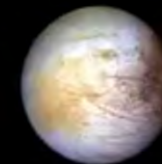

Jupiter has over 60 moons, they are no comfort for evolutionists either. The largest are Ganymede, Calisto, Europe, & Io

Sorry Rich, the Bible knows how they were made.

Io

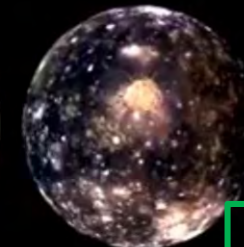

Europa

Ganymede

Calisto

*JUPITER'S GANYMEDE & CALLISTO*⁸⁴

According to evolutionary model Ganymede shouldn't have magnetic field, BUT IT DOES!

Most cratered in the solar system. Evolutionists believe it has the oldest surface of all, 4 BILLIONS

It should've lot more small craters for its age, BUT IT DOESN'T

Ganymede

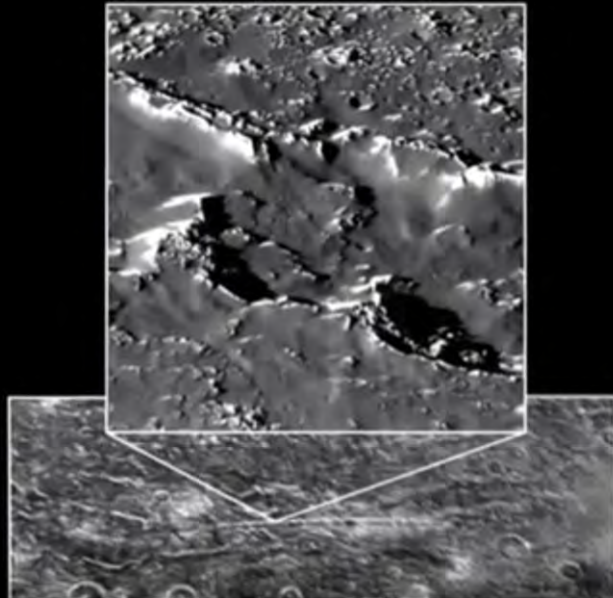

CALLISTO

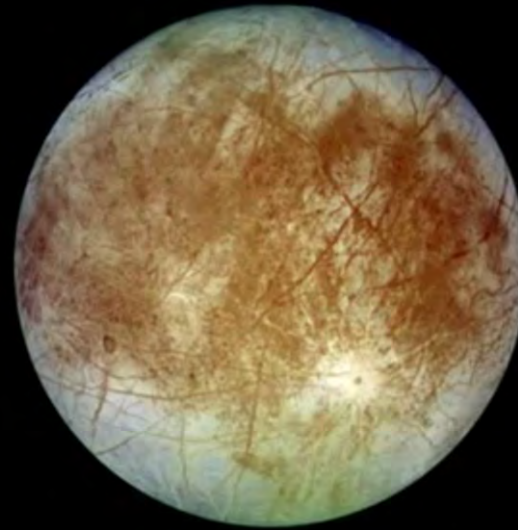

JUPITER'S CALLISTO & EUROPA³⁵

On Callisto appears fresh ice over there, i.e., **there's still erosion and geological activities going on** but it should be cold, old, and dead. **IT ISN'T!**

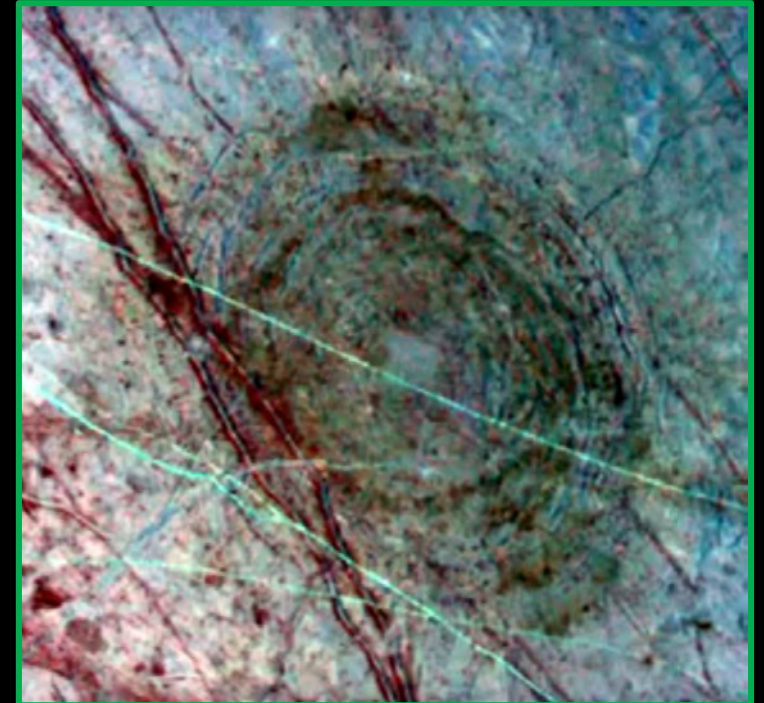

Its surface is very smooth and is covered by several miles thick ice. Some believe there is water beneath it building up **disparate hopes for life** seekers despite its ridiculousness.

EUROPA

95% of small craters and lot of medium ones are formed from debris from large ones this means **all these craters were formed in much less time than thought to be.** THIS RICKS THE EVOLUTIONARY MODEL!

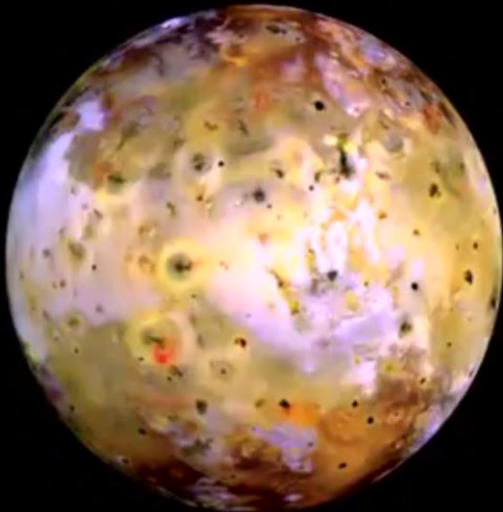

JUPITER'S WILD IO

86

Is the smallest of the 4. the most spectacle place in the solar system, lot of volcanos. Some of the heat it emits due to "Tidal Flexing" due to gravitation forces of Jupiter on one side and its large moons on the other side.

Every spot is a volcano, over 400, 150 of them still active today. Loki is more powerful than all the earth's volcanos combined.

Some volcanos shoot lava 180 miles high, some guizers of lava over 2,000 Miles/hr. It puts out twice as much heat as the earth does, where is comes from?

Io

Loki

JUPITER'S WILD IO

100 m³ of lava/sec!

1:03:16 / 1:46:10

These are 3 consecutive live pictures before, during, & after the lava lake Patara was formed. It's as big as the state of Iowa. Similar volcanos produce such too much lava in just 2 days. Is Io doing this for 4.5 billion years?

The earth's lava is amazing 2,000°F,. Evolutionists were shocked to find some of Io lava is 1,000°F hotter and very dens! After few million years Io must have low density crust after the heavy material had been used. Forget even the millions of years, Io fits the Biblical creation model.

JUPITER VIOLATIONS

ACCORDING TO
EVOLUTION:

- JUPITER CAN'T BE SPINNING AS FAST AS IT IS.
- IT CAN'T BE MADE UP OF WHAT IT IS MADE UP OF.
- THERE WASN'T ENOUGH TIME FOR JUPITER TO FORM.

SATURN

- **No one knows how they were formed.**

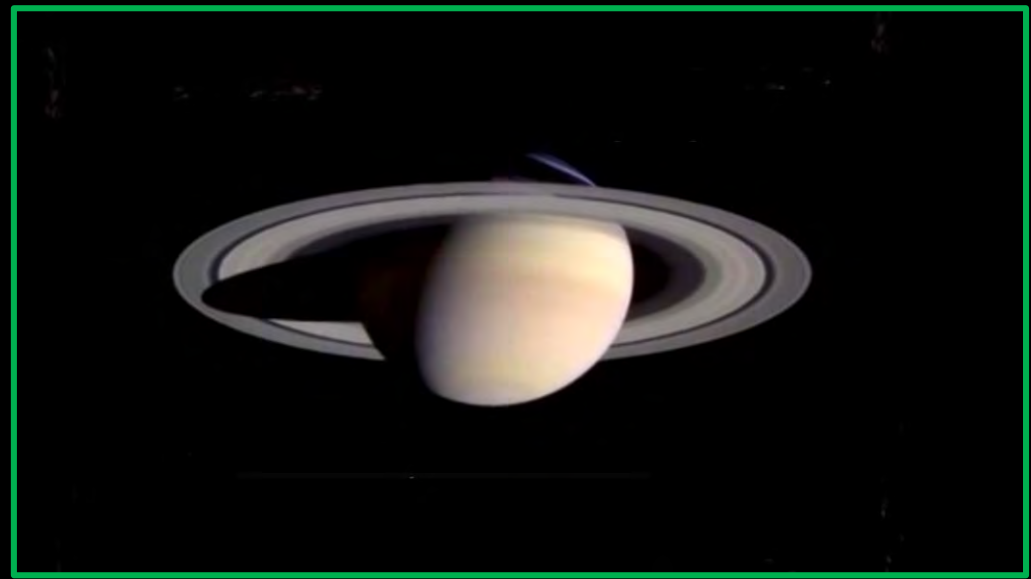

SATURN

SATURN RINGS

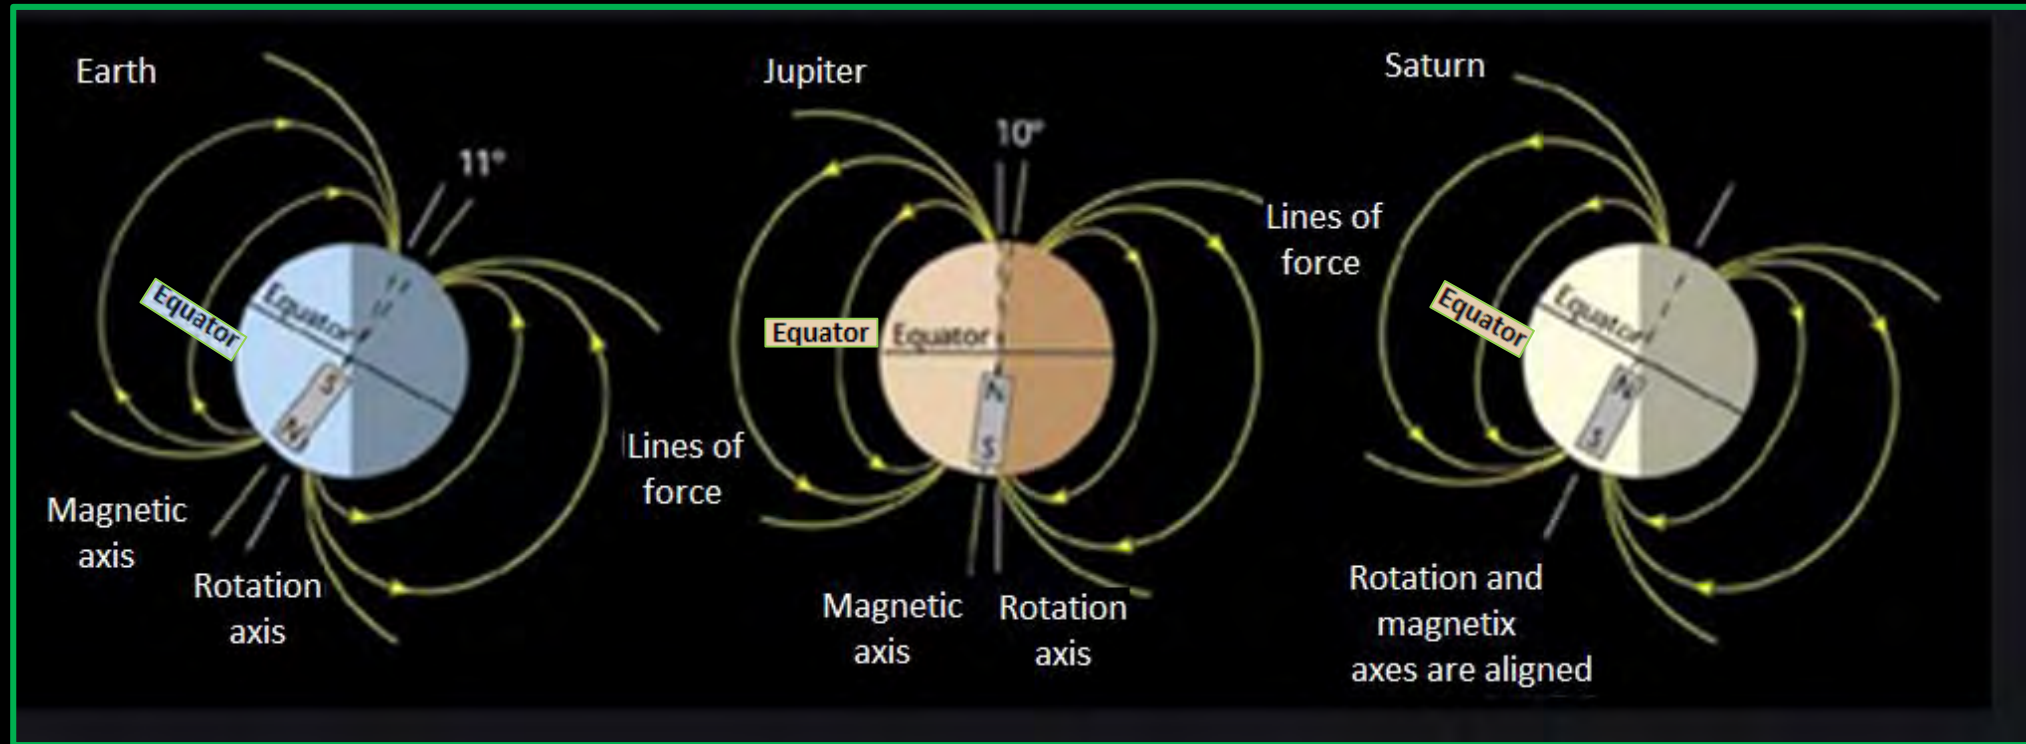

No one knows how and when they were formed. Must have been this **annoying asteroid that formed the rings** from the debris caused by its smashing into a Saturn.

NASA however on 4/25/2008 reported, Saturn Rings: **Ages and origin unknown.**

Ring thickness & diameter are as a sheet of paper of San Francisco area.

SATURN MAGNETIC FIELD

"Saturn dumbfounded planetary theorists who study **dynamo models** by having a high symmetric internal magnetic field. A field that is symmetric about the rotation axis **violates a basic theorem of magnetic dynamos**." Fran Baganell, "A new spin on Saturn's rotation", Science 316:380, 4/20/2007

SATURN DEFIES BB

BIG PROBLEM: If the evolution model of gas and dust cloud that supposedly form all the planets was true Saturn and Jupiter wouldn't be existing. The reason is the massive protoplanetary core would have pulled the gases inwards by its massive gravity within 100,000 years. **"The theory predicts that the giant protoplanets will merge into the central star before planets have time to form."** Astronomy and Astrophysics press release "The locked migration of giant protoplanets"

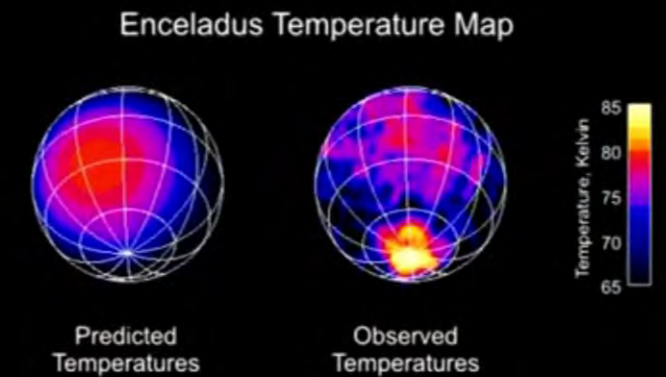

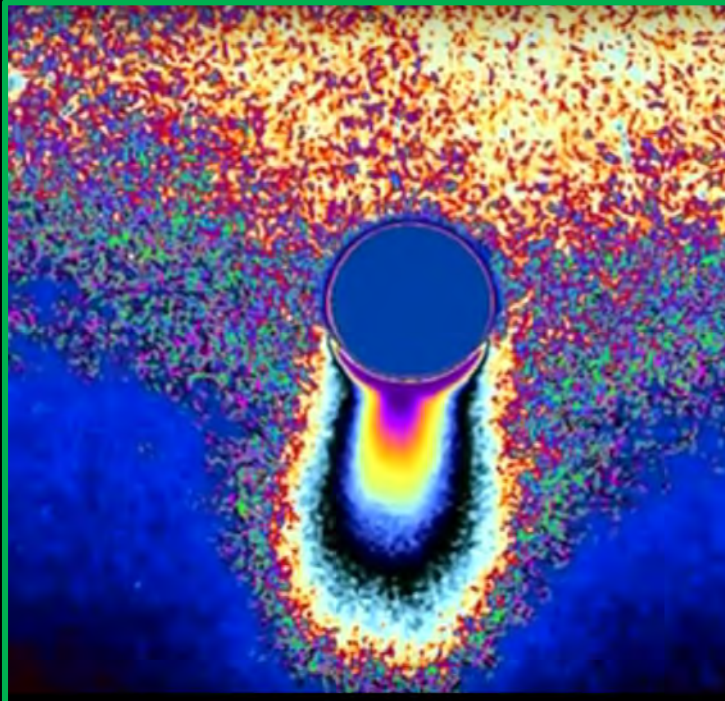

SATURN'S ENCELADUS

94

Saturn has dozens of moons. This one is Enceladus

Huge guizer comes out of its south pole. Evolutionary model can't explain it.

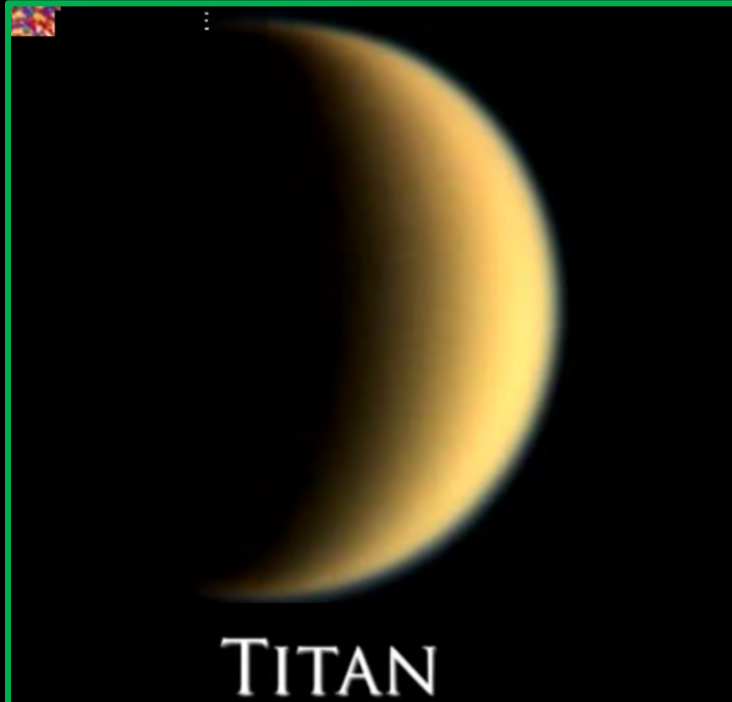

Enceladus supposed to be old, cold, and dead: Apparently it is not!

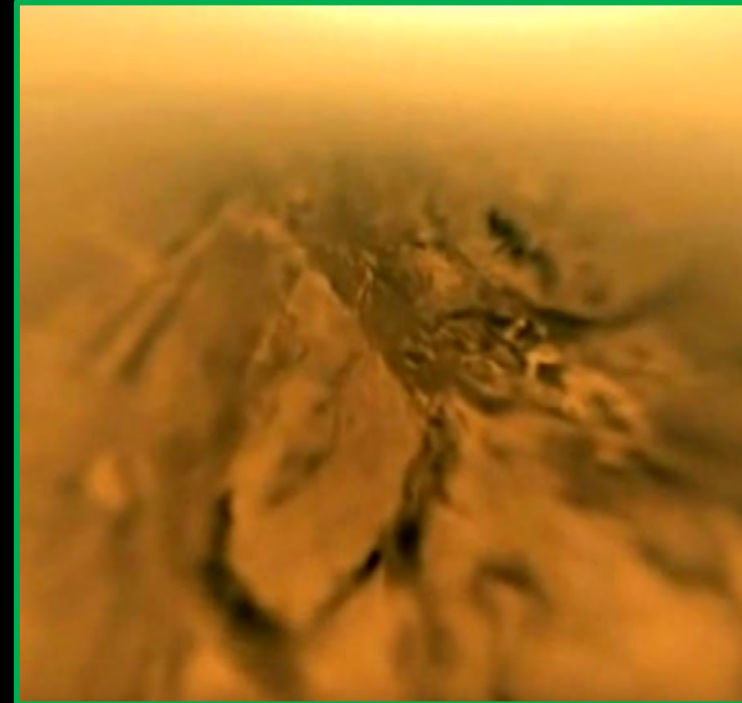

SATURN'S TITAN

95

Titan has Nitrogen and methane atmosphere. It can't survive sunlight more than few millions of years, not 4.5 billions

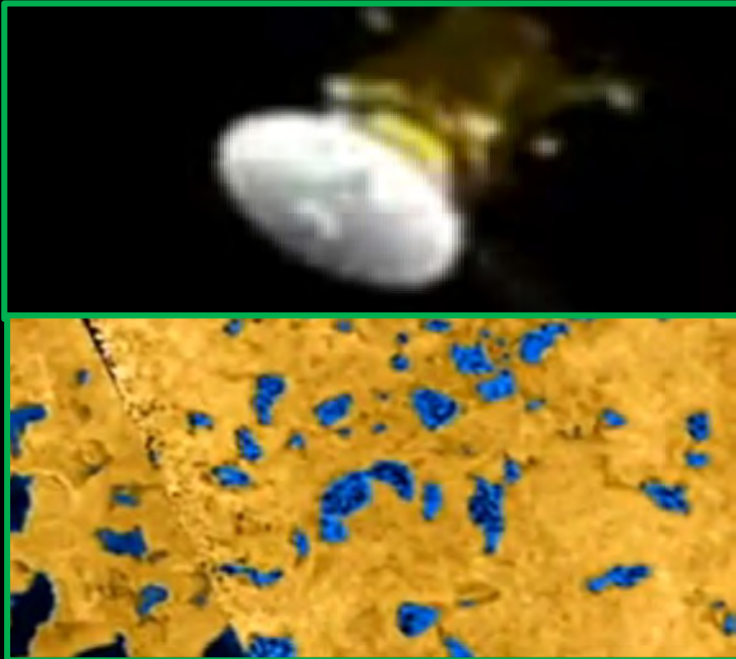

If it's billions of years it should have methane generator and deep oceans of methane & ethane.

SATURN'S TITAN

Cassini probe found just little lakes of methane & ethane, Neither methane oceans nor generators were found, just methane puddles.

Since Titan has solid surface evolutionists predicted to find thousands of craters on its surface. When they finished counting 10% of its surface, they found just FOUR.

SATURN JANUS & EPIMETHEUS BALLET

URANUS

- 84 years to orbit the sun.
- Voyager II told us all about it 1986.
- Defies evolution in multiple ways.
- Its poles are on the side unlike all other planets, defying the nebula theory, tilted by Fix-all asteroid.
- Uranus is stable, its orbit is almost perfect circle, its orbit lies more closely within the plane of ecliptic than any planet besides earth.
- Has over 2 dozen moons.
- Has faint ring system.

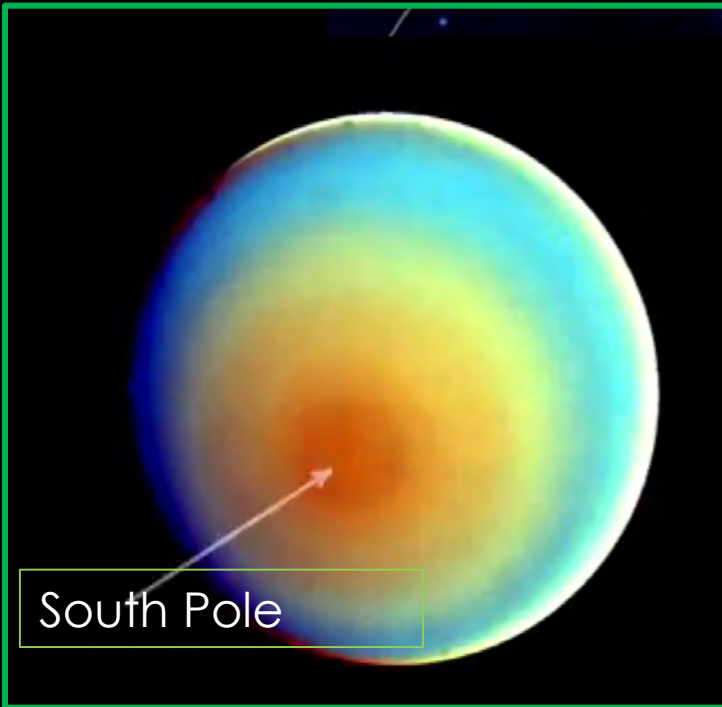

URANUS LAYS ON ITS SIDE

Voyager II 1986

Should have been on the top and bottom as all other planets. It defies nebula theory.

Fix all asteroid about the size of the earth to twist Uranus. This is wrong because: It is stable, its orbit is almost perfect circle, the orbit second almost perfect ecliptic after the earth.

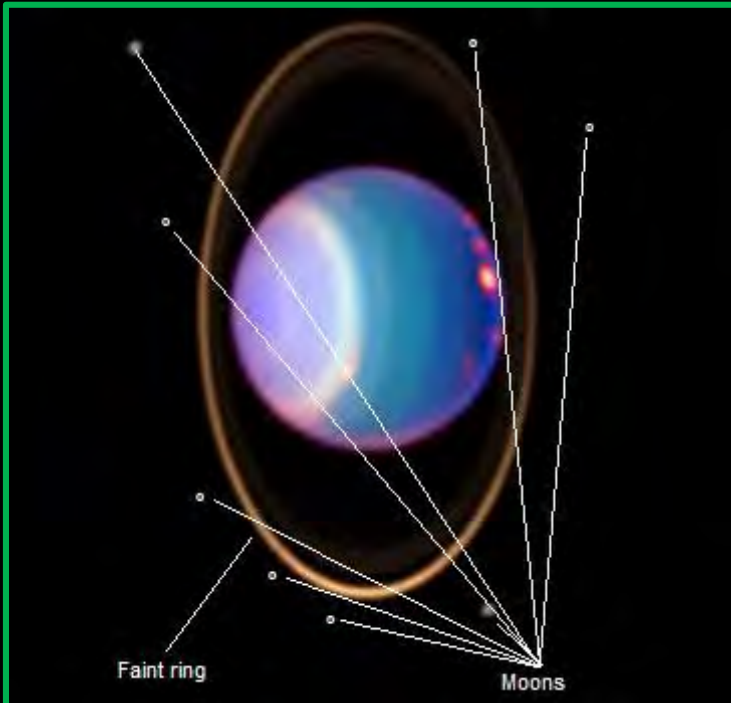

URANUS' MOONS

MARS IS A DESERT PLANET.
IT'S PHYSICALLY
IMPOSSIBLE FOR LIQUID
WATER TO EXIST THERE
TODAY.
EVOLUTIONISTS
BELIEVE MARS USED
TO BE FLOODED WITH
WATER ANYWAY.

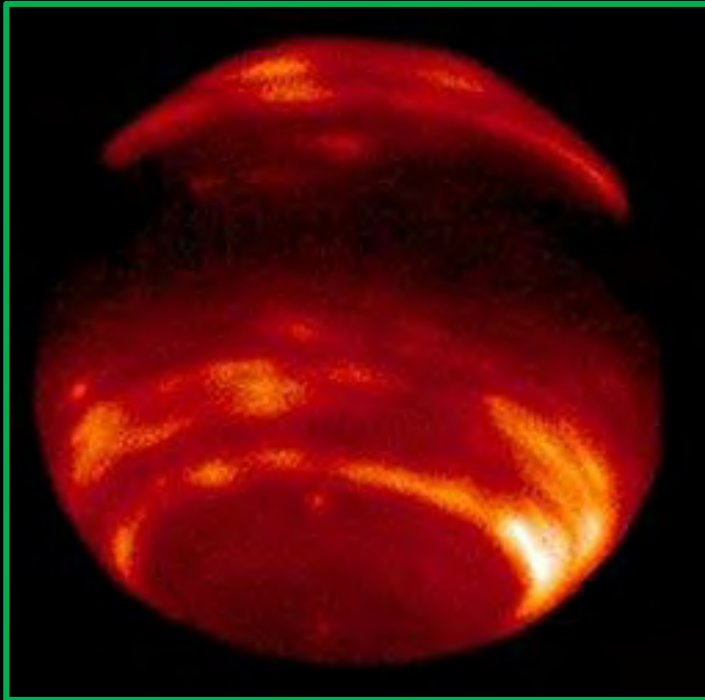

NEPTUNE

- Sun's light takes 7 hours to reach it
- Should be COLD, OLD, and DEAD, it is not?
- COLD? It radiates about twice the energy it receives from the sun!
- OLD? It still has magnetic field!
- DEAD? It is violent, turbulent, strongest wind in the Solar System (SS), up to 1300 miles/hr!
- According to Big Bang Neptune should not exist at all.

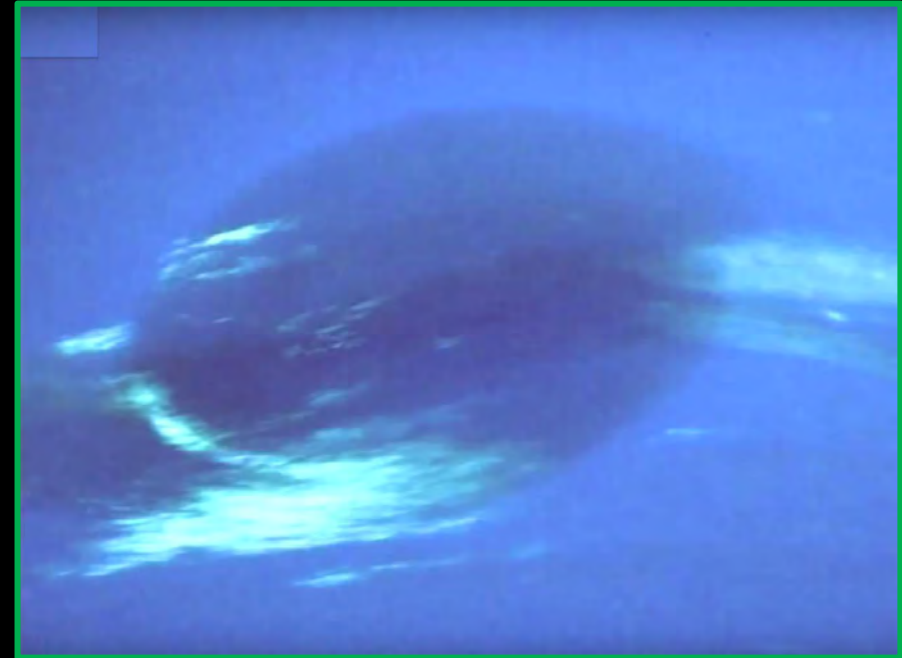

NEPTUNE IS NOT COLD OR DEAD

Neptune isn't cold, it **emits heat twice as much it gets from sun**

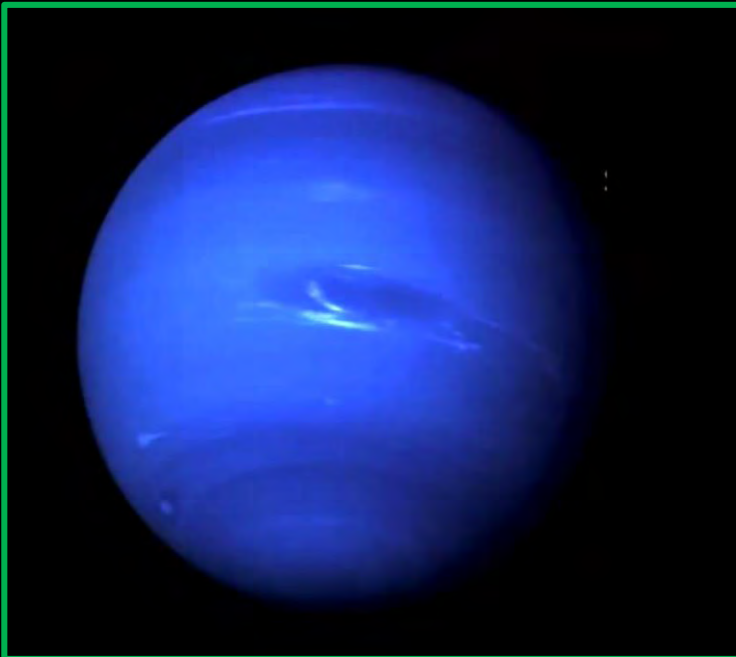

It isn't dead either, winds up to 1300 miles/hr, strongest in whole SS. This black spot is a massive storm almost as big as the earth (Voyager II)

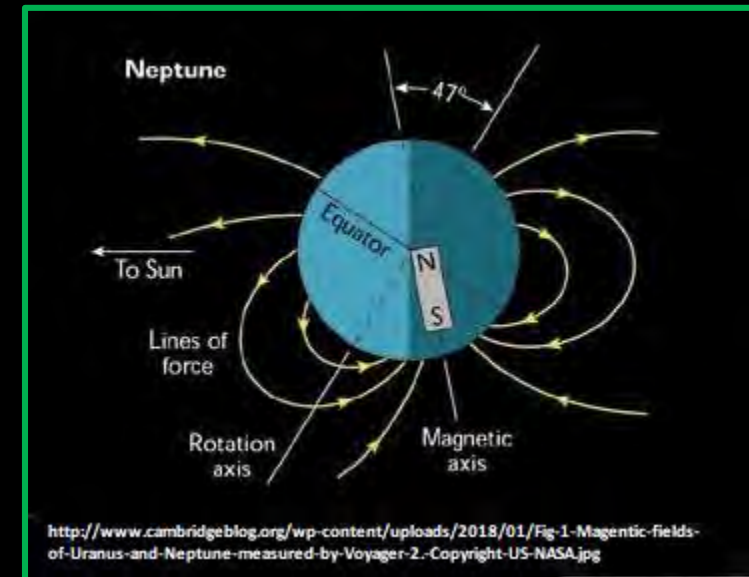

NEPTUNE HAS MAGNETIC FIELD

Also not dead, this is another massive storm few years later after the previous one (Hubble space telescope)

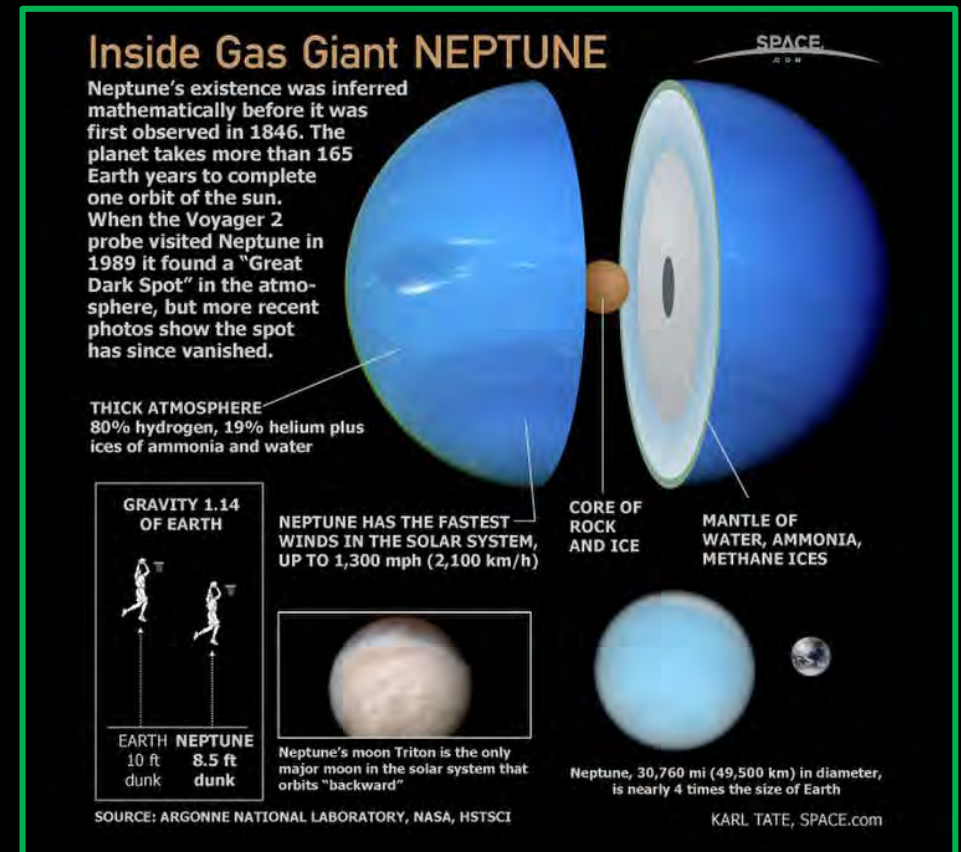

Just like Uranus, Neptune has magnetic field and it is tilted and offset from its center likewise. It is much stronger than the evolutionists expected but right on the dot like creationist Russel Humphreys predicted based on creation model.

NEPTUNE SHOULD NOT EXIST

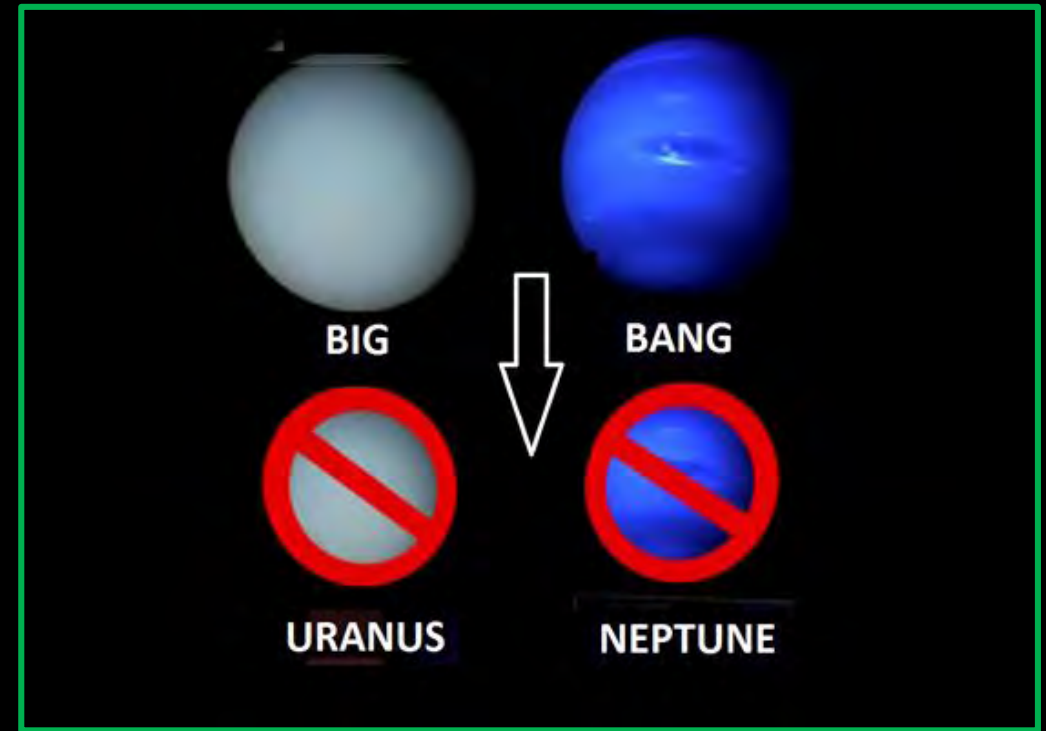

- According to Big Bang simulation both Uranus and Neptune do not exist.
- The simulation have never explained how planets as big as the two gas giants could form so far from the sun although they were predicted before they were seen in 1846.

NEITHER NEPTUNE NOR URANUS SHOULD EXIST

- According Big Bang bodies at the outer parts of the sun's **protoplanetary disk** **require longer than 4.5 billion years to form bodies** 14.5 and 17.1 times the mass of the earth, Uranus (and Neptune) are illegal.
- IN 1972 Safronov calculated that the **Earth needed 10 million years while Neptune requires 10 billion years**, twice the solar system age.
This had never been made known

COMETS AND TRANS-NEPTONIAN OBJECTS (TNOs)

- Very far away objects.
- Pluto one of them, degraded to dwarf planet in 2006.
- According to the big bang they are leftovers from the protoplanetary disk or byproducts of the solar system.

COMETS AND TNOS

The sun As seen
from TNOS

COMETS AND TNOS & PLUTO

- **Pluto** was known as the smallest planet in the solar system and the ninth planet from the sun until it was **reclassified** by the International Astronomical Union in 2006. Today, Pluto is called a **dwarf planet**. A dwarf planet orbits the sun just like other planets, but it is smaller.
- Pluto **has a moon called Charon**.
- We know very little about Pluto, so we will leave him alone.

LARGEST TNOs

- They are **leftovers** from the protoplanetary, i.e., billions of years old.
- They supposed to be **COLD, OLD, and DEAD**, but they are geologically active.
- Many have **fresh ice on them**, this apparently came **from volcanic eruption**, if they are OLD they can't be volcanic active any more.
- Comets are dirty **snowballs**.
- They may 1)fade away each time they approach the sun, 2)smash into the sun or one of the planets, 3)expelled off the solar system.

COMETS

- Big Bang states that no comets or TNOs are formed now, so all are billions of years old.
- We see a lot of them, they can't last that long, on the average 10,000 yrs.
- Evolutionists invented OORT cloud which has billions of old, cold, & dead comets far away from sun

COMETS AND TNOs

126

Comets are dirty snow balls. When they come close to the sun the ice start to sublimate.

and become steam which we see as white beautiful tail away from sun

Comets become smaller each time they pass by the sun; they also may crash into the sun or planets as we saw with Jupiter and Shumaker-Levy comet.

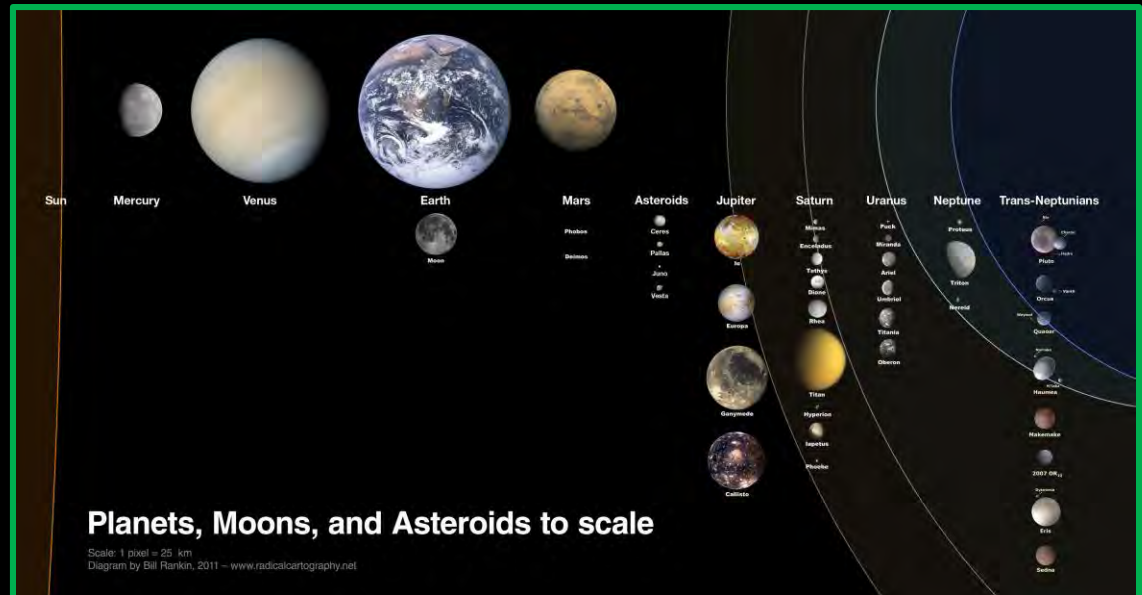

COMETS AND TNOS VIOLATIONS

127

- The TNOS we see look young, not old.
- Comets material we sampled contradicts the evolutionary model.
- Comets shouldn't be here if the solar system is billions of years old
- They are not so beautiful only, but they also reveal the utter bankruptcy of evolutionary model.

SCHUMACHER SLAMS IN JUPITER

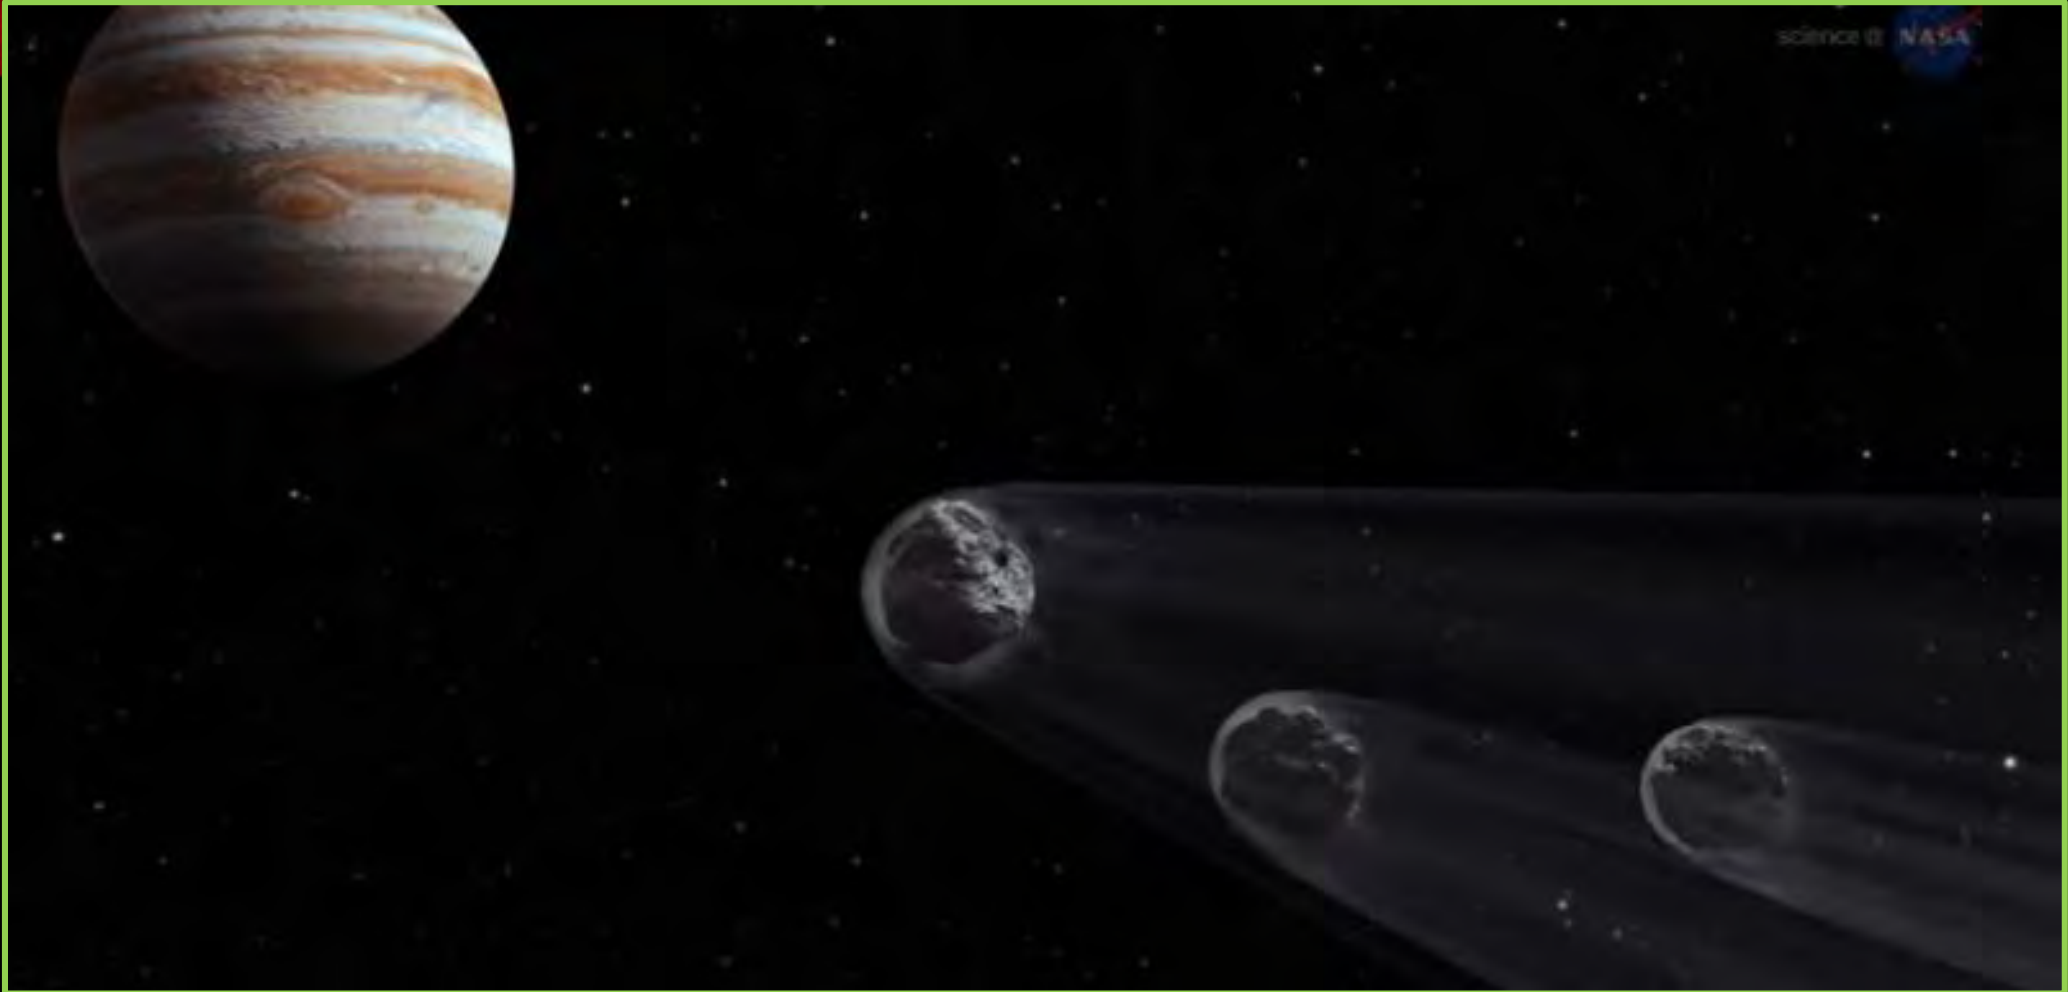

128

Schumacher scars on Jupiter, July 1994. A present age cosmic catastrophe we witnessed by our eyes. Jupiter proved itself to be a good bodyguard designed by God to protect the Earth from possible devastation if Jupiter was not at guard.

How they look like

THE LASTING IMPACTS OF COMET SHOEMAKER

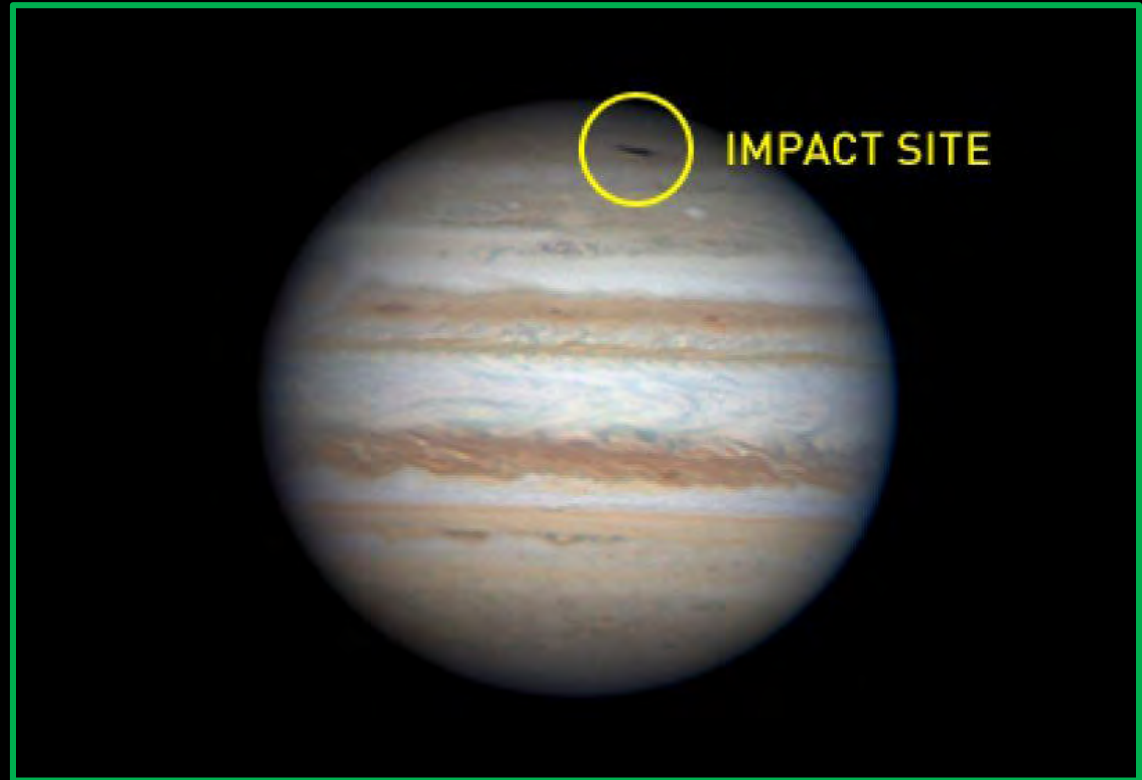

Please use control + left-mouse click on the link below or copy and paste into browser address bar then come back to this page

WHAT COULD HAPPEN IF IT HIT US?

The Anthropic Principle in action perfected by God. We witnessed in our lifetime how God's design for the solar system and the universe has one underpinning: Human Protection.

Jupiter is the guardian of the inner solar system. Its powerful gravitational field draws comets and other space rocks away from Earth and its neighbors. We now under-stand how these small objects speed around the solar system far better than ever before, and it turns out that planetary collisions may be more frequent than previously thought.

GOD'S DESIGN IN ACTION!

Scientists have calculated that the comet was originally **about 1.5 to 2 kilometers (0.9 to 1.2 miles) wide**. If a similar-sized object were to hit Earth, it would be devastating. The impact might send dust and debris into the sky, creating a haze that **would cool the atmosphere and absorb sunlight, enveloping the entire planet in darkness**. If the haze lasted long enough, **plant life would die – along with the people and animals that depend on it to survive**.

IN PLAIN ENGLISH

- “To sum it up, I think that all suggested accounts of the origin of the solar system are subject to serious objections. The conclusion in the present state of the subject would be that **the system cannot exist.**”

Sir Harold Jeffreys, *The Earth: Its Origin, History, and Physical Constitution*, p. 359

- **The more the evolutionists research to prove godless creation the more the godly creation becomes obvious and unquestionable.**

“The heavens declare the glory of God; and the firmament sheweth his handiwork.”

Psalms 19:1

CONCLUSION

- The big bang is a necessary galactic face of evolution.
- *DESPITE THE UNGODLY CLAIMS CAME THROUGH THE BIG BANG THEORY IT AGREED WITH GENESIS IN TWO CRUCIAL ITEMS: 1-TIME, SPACE, & MATTER HAVE BEGINNING AS PER THE VERSE ABOVE, 2-THEY CAME OUT OF NOTHING.*
- It is taught as factual scenario of godless forming of the universe although it violates the top utmost principle laws: Laws of Thermodynamics.
- According to the Big Bang the solar system was formed from a disk of huge clump of gas compressed and put into spinning by the explosion of a giant star.
- The gas formed dust (hah?), the dust clumped together to form small rocks, which in turn clumped together to form bigger rocks (this and the next steps are not possible, collision would demolish both parties), then comets, then asteroids, then planetesimals, then planets while the center formed the sun.
- The planets are Mercury, Venus, Earth, Mars, Jupiter, Saturn, Uranus, & Pluto.
- Each of these planets violates the Big Bang in its own way.

CONCLUSION

- **Mercury's** Violations:
 - Evolution says it can't be **dense**, but it is.
 - Evolution says it can't have **magnetic field**, but it does.
- **Venus'** Violations:
 - **Different than earth** in important ways.
 - Its surface is **young**.
 - It's consistent with young solar system.
- **Earth's** Violations:
 - **Uniquely designed** and not haphazard as the big bang mandates: **Perfect axel tilt, rotation speed, close to circular orbit, perfect atmosphere, ..etc.**
 - **Magnetic field, ocean salinity, ocean silt, ...** can't be millions of years old

CONCLUSION

- Earth's **Moon** Violations:
 - Evolution can't explain its **origin**
 - **Fission theory flunks** because:
 - Moon **rocks** are different
 - **Fission** would produce 1000°C increase in earth's temperature
 - **Nebula theory** flunks because:
 - Lunar **material is different**
 - Problems getting the earth and moon **out of the nebula**
 - **Capture theory** flunked because:
 - Earth's gravity would have **accelerated the moon**
 - The moon would've **either hit the earth or be repelled** and flown away
 - Evolution can't explain its **geological activity or its ghost craters**
 - Evolution can't explain its **recession**

CONCLUSION

- **Mars' Violations:**
 - Liquid **water is not** possible on Mars
 - Global water flood on mars which has no water but non on earth which has plenty.
- **Jupiter's and its moons' Violations:**
 - Too **fast spinning**.
 - Incorrect **contents**.
 - It needed **longer time than 4.5** billion years to form.
 - **Ganymede shouldn't have magnetic field.**
 - **Calisto shouldn't be geologically active.**
 - **Europe disproves long-age crater count.**
 - **Io looks young.**

CONCLUSION

- **Saturn** Violations
 - Should have been absorbed by the sun before formation (**migration problem**).
 - His **magnetic field** defies evolution (spin axel aligned with magnetic axel).
 - **Enceladus is young and violent** (no methane/ethane oceans).
 - **Titan is young** (few craters).
 - **Dancing moons**.
 - Our creator is not only skilled but also appreciates beauty.
- **Uranus and its moons'** Violations
 - Wrong **rotation direction**
 - Shouldn't have **magnetic field**
 - **Does not radiate energy** unlike other jovial planets
 - **Miranda is complete mystery**
 - Its existence violates the big bang

CONCLUSION

- **Neptune** Violations:
 - It looks **young**, not billions of years old.
 - Its **magnetism** defies evolution.
 - According to evolution it can't be there at all.
- **Comets and TNOs** Violations:
 - The TNOs we see **look young**, not old.
 - Comets material we sampled **contradicts the evolutionary model**.
 - Comets **shouldn't be really here** if the solar system is billions of year old.
 - They are not so beautiful only, but they also reveal the utter **bankruptcy of evolutionary model**.

CONCLUSION

- What are the **constituents** of “Evolution”?
- What is the **motivation** for the big bang theory?
- Which major law(s) it **violates** right from the beginning?
- Explain briefly how the **Big Bang claims** the godless formation of the solar system.
- Explain why **rocks can't clump** together to create bigger rocks and the next steps in the Big Bang **solar system** formation scenario.
- List two or more **violations** for each of the planets and their moons if any.
- Explain how the earth **unlike** any of the other planets is very privileged for life.

Dashed line shows degree of tilt in relation to Sun.

Arrow shows direction of planet's rotation.

How do you organize a party in space?

SIDE NOTES: COMETS SUPPLIERS?

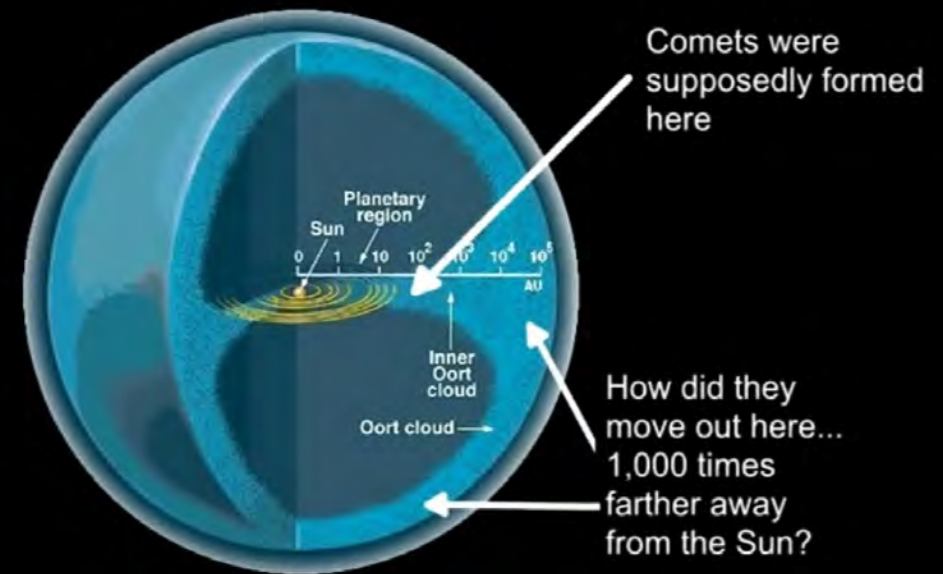

Claim for fresh supply of new comets:

- This OORT cloud keep feeding a Kuiper Belt which works as clearing house for comets and passes them to us.
- OORT Cloud:
 - Never been seen.
 - They are created in the space between the Kuiper and OORT then migrated to OORT. Can't be because overwhelming majority would have been crashed into powder.
 - The comets we see are short period comets. They live 200 years only but no more than 10,000 yrs. They should've gone long time before.

SIDE NOTES: OORT & KUIPER COMET CLOUDS

- The material collected from a comet's tail found to be chemically the direct opposite to the Big Bang theory.
- Scientists found 3 comet nuclei in a region was supposed to have 85. this means the source nuclei of comets is hundreds if not thousands less. It can not provide the number of comets we see
